Vancouver, B.C., Canada**

Introduction

- Purpose:

To present a new framework for examining institutional and contextual factors that advance student success

To use a framework to guide research and practice particularly within broad access institutions

Student Success Outcomes

- Habits of Mind/Skills for Lifelong Learning
- Competencies for a Multicultural World
- Achievement and Retention

Foundational Frameworks

- **Institutional Adaptation to Student Diversity**

Richardson & Skinner (1990)

- **Campus Climate for Diversity**

Hurtado, Milem, Clayton-Pedersen & Allen (1998, 1999)

Milem, Chang & Antonio (2005)

- **Student/Institution Engagement Model**

Nora, Barlow & Crisp (2005)

- **Dynamics of Multicultural Teaching & Learning**

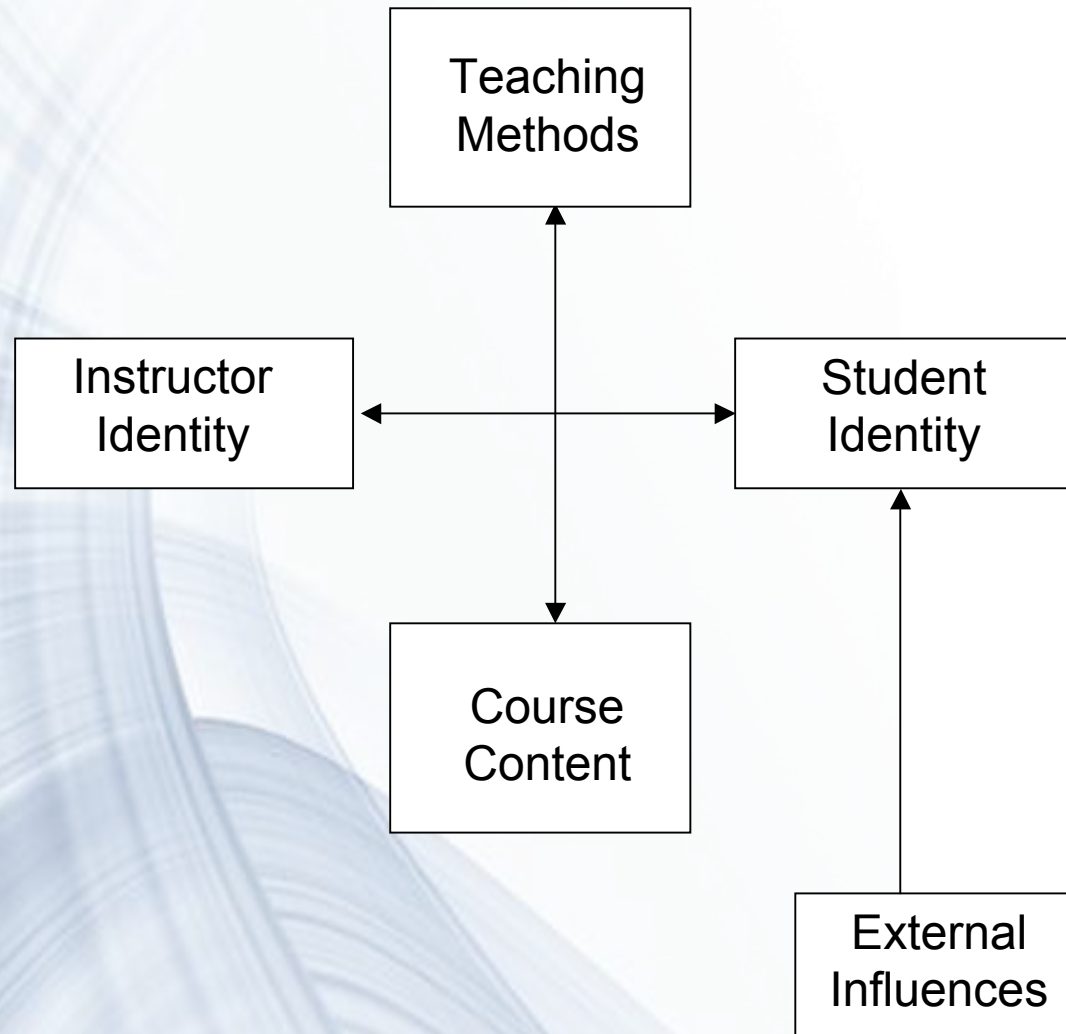

Marchesani & Adams (1992) adaptation of Jackson (1988)

The background of the slide features a complex, abstract pattern of overlapping, curved lines in various shades of blue and white. These lines create a sense of depth and movement, resembling a stylized architectural structure or a dynamic, flowing field. The overall aesthetic is clean, modern, and professional.

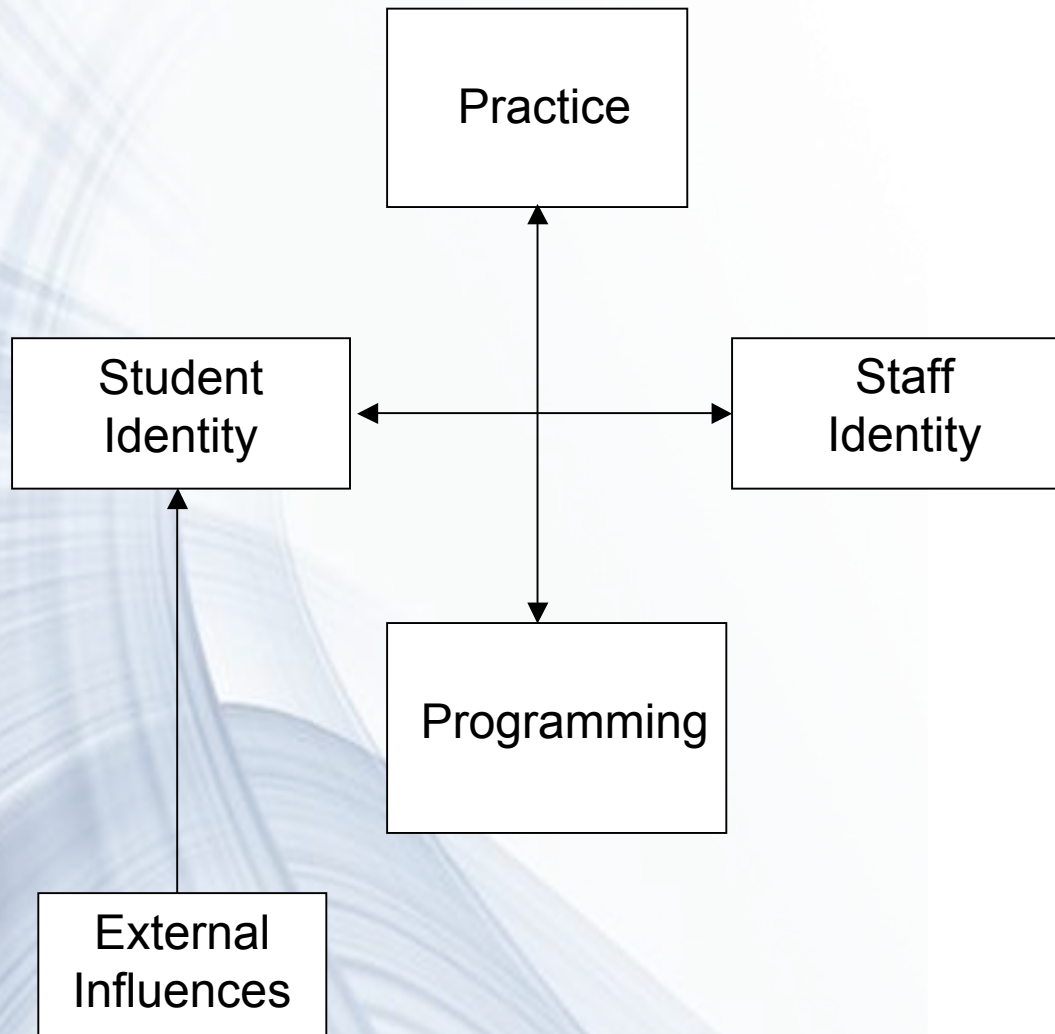

Presentation of a Conceptual Framework

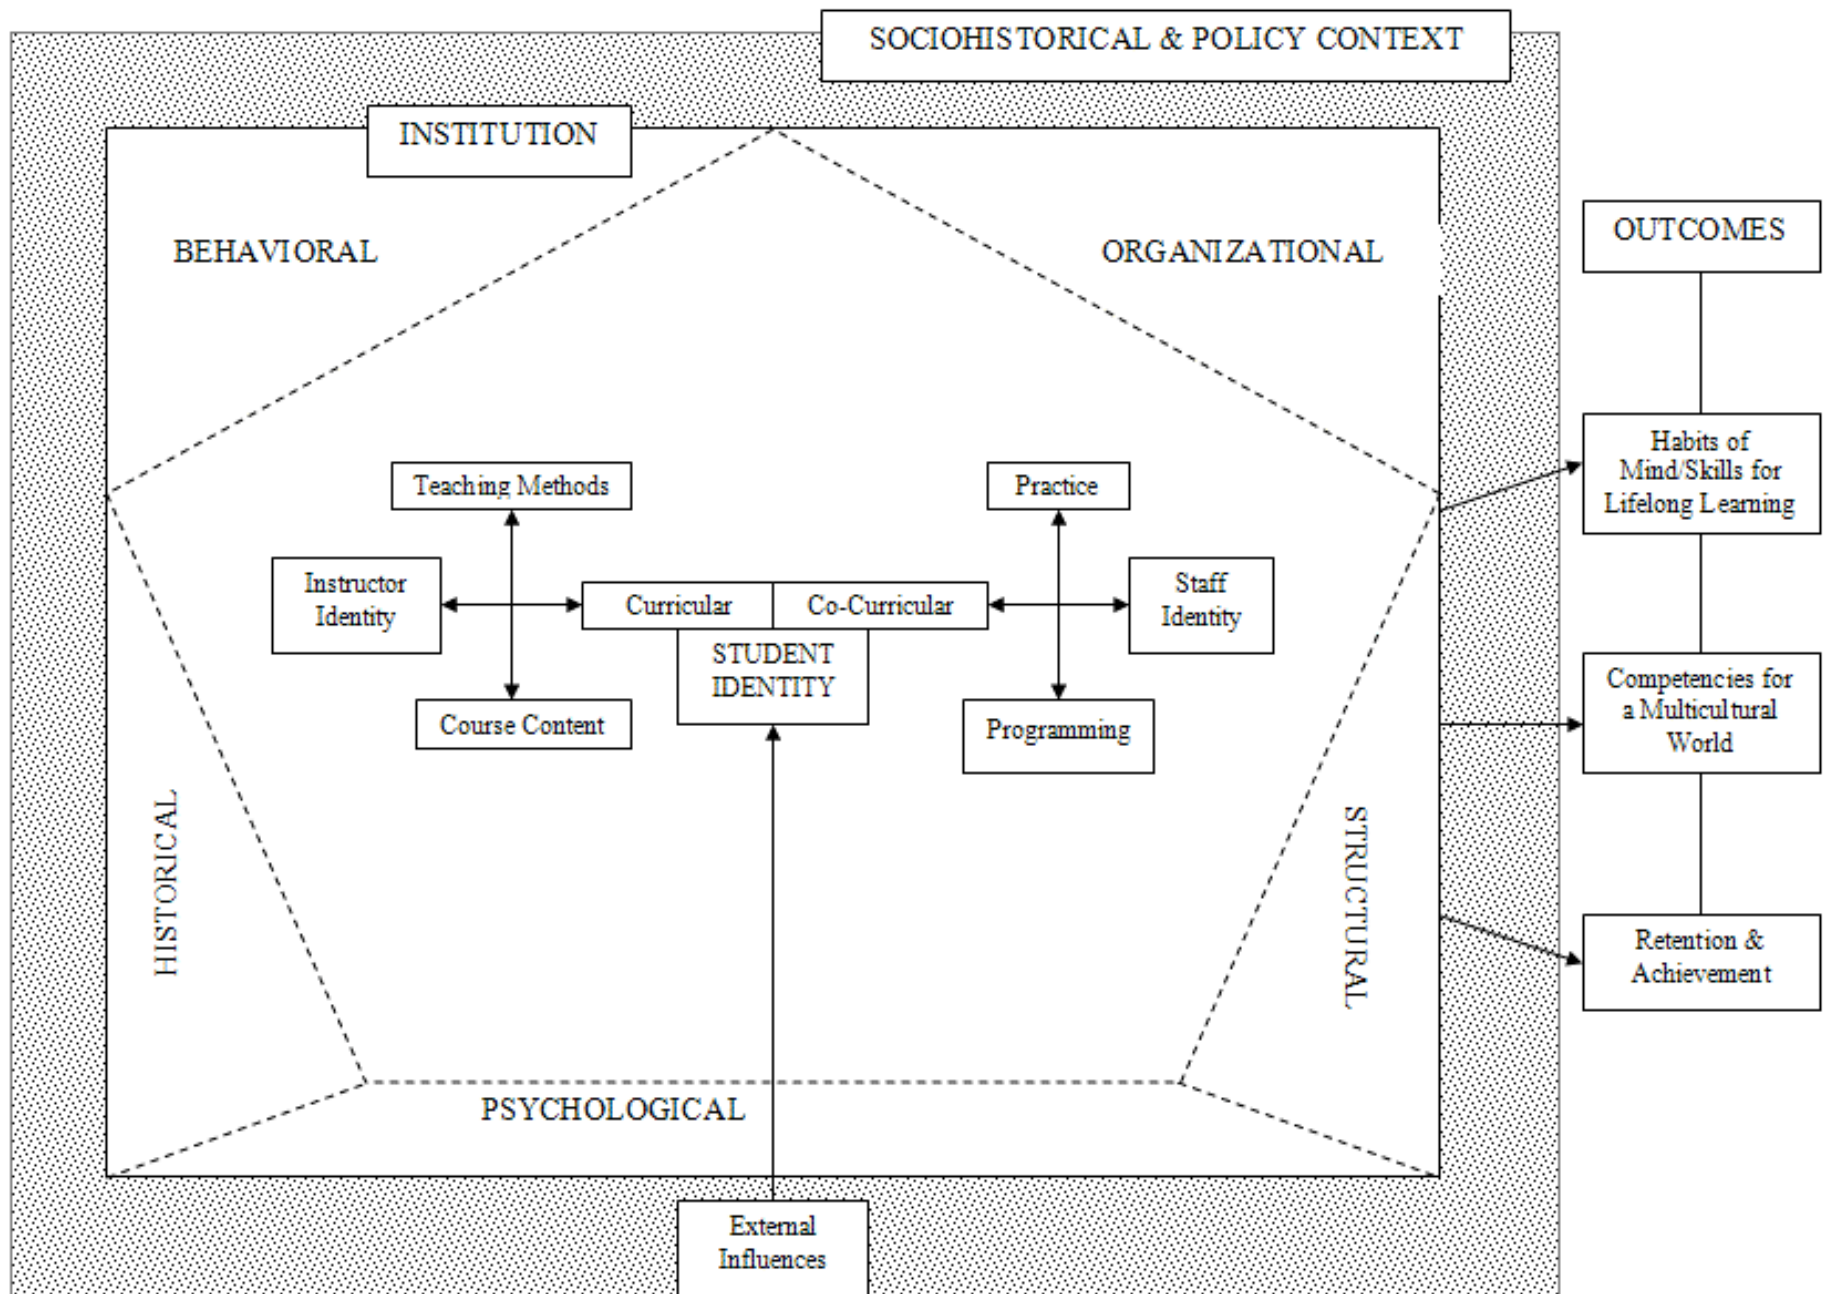

Curricular Context

Co-curricular Context

Psychological Sense of Integration

Processes take place within the curricular and co-curricular contexts

- Sense of Belonging- already linked with retention and climate in several studies
- Validation – moving towards an empirical test of this in relation to overall climate and outcomes

Conclusion and Next Steps

- Assessment of multiple dimensions of the institution is a key component in understanding how the institution affects student success
- A primary goal of assessment is to include climate, practices, and outcomes to aid institutional transformation
- Next Steps: Develop instruments and case studies based on the framework
