This report summarizes the highlights of a national survey of college and university faculty conducted by the Cooperative Institutional Research Program (CIRP) at the Higher Education Research Institute (HERI) during the 2016-2017 academic year. Although HERI has been surveying higher education faculty since 1978, this report is the tenth in a series of faculty surveys administered on a triennial basis since 1989. Over the past three decades, the HERI Faculty Survey has collected data from over half a million faculty at more than 1,100 colleges and universities. | Over the past three decades, |
| :--- |
| the HERI Faculty Survey has |
| collected data from over |
| half a million faculty at |
| more than 1,100 colleges |
| and universities. |

While HERI encourages institutions to collect data on their entire faculty, historically these reports have focused on full-time undergraduate (FTUG) teaching faculty. Institutions receive reports for faculty respondents with teaching, research, and administrative obligations. Consistent with previous administrations, we included a set of questions specifically addressing the experiences of faculty employed in part-time positions as well as those who work with graduate students.

This year's survey included four optional modules for campuses to append to the core survey. Similar to the 2013-2014 administration, institutions could choose to add modules focusing on campus climate, spirituality, or STEM. Several changes to the core and modules for 2016-2017 included moving the sexual orientation and gender identity questions from a separate module to the core instrument. Further, items from the advising module were added to the core and a new module focused on faculty mentoring undergraduates, graduate students, and other faculty was added. We highlight findings from the mentoring module in this monograph.

> A section on mentoring examines the complex mentoring relationships faculty members have with undergraduates, graduate students, and other faculty.

The bulk of the results reported here are based on responses from 20,771 full-time undergraduate teaching faculty members at 143 four-year colleges and universities. Data for full-time faculty are weighted to provide a norma- tive national profile of full-time faculty at four-year colleges and universities; Appendix A contains details about methodological considerations, including how these weights were calculated. Complete results of the survey presented for full-time faculty are reported separately for male and female faculty in each of eight different normative groups: all institutions, public universities, private universities, public four-year colleges, and private four-year colleges (combined and broken out by three sub-groupings: nonsectarian, Roman Catholic, and other religious). Survey data by academic rank are also reported in additional
tables available in the online expanded version of this publication. ${ }^{1}$

## The Survey Questionnaire

The 2016-2017 questionnaire was based largely on items used in the nine previous faculty surveys, which were revised following the suggestions of HERI-affiliated researchers actively studying faculty concerns and topics related to teaching and learning. In addition to collecting demographic information, the web-based questionnaire focuses on topics such as how faculty spend their time, how they interact with students, their preferred methods of teaching, their perceptions of institutional climate, their primary sources of stress and satisfaction, and their personal and professional goals. The questionnaire also includes a section that allows individual institutions to ask their faculty up to 30 locally designed closed-ended questions and five open-ended questions, though these campus-specific questions are not reported here.

## An Overview of the 2016-2017 Faculty Survey Norms

The 2016-2017 report first highlights findings related to faculty's views on discrimination as a source of stress. We then explore faculty perspectives on the fair treatment of female faculty and faculty of color and note the differences in faculty feeling that they have to work harder than their colleagues to be perceived as a legitimate scholar. We also analyze respondents' satisfaction with the equity of salary and job benefits before addressing faculty readiness to deal with diversity-related conflict in the classroom. A section on mentoring examines

[^0]the complex mentoring relationships faculty members have with undergraduates, graduate students, and other faculty. We then highlight faculty views on the role they play in undergraduate student development and another focusing on encouraging students to think and act critically.

The final sections address media criticism of faculty as a liberalizing agent of college students with an analysis of faculty political views over time. Another pressing topic is the teaching of remedial/developmental courses and the overrepresentation of lecturers and instructors overseeing these courses. The report concludes with a section on faculty taking advantage of teaching-related professional development opportunities.

## Discrimination a source of stress for female faculty of color and female STEM faculty

Overall, women are more likely than men to feel that discrimination is at least somewhat a
source of stress ( $36.2 \%$ compared to $18.0 \%$ ). The largest gaps between men and women occur at public and private universities. Only $15.7 \%$ of men at private universities consider discrimination at least somewhat of a source of stress, compared to $38.7 \%$ of women, a difference of 23 percentage points. A slightly larger gap exists at public universities, with $18.8 \%$ of men and $43.3 \%$ of women considering discrimination a source of stress.

Similar to the gap between men and women, White faculty (21.5\%) are less likely than all other race/ethnicity groups to consider discrimination a source of stress. Of faculty of color, Asian/Pacific Islander faculty are least likely (30.9\%) to consider discrimination at least somewhat a source of stress while Black/African American (49.9\%) and Latino/a (51.4\%) faculty are most likely to feel this way.

When considering the intersecting identities of sex and race/ethnicity, larger gaps emerge. Figure 1 shows that White male faculty are least likely to consider discrimination a source of

Figure 1. Discrimination as a Source of Stress, by Race/Ethnicity and Sex (\% Responding "Somewhat" or "Extensive")

stress (13.9\%), roughly 17 percentage points lower than White female faculty. Though sex differences within race/ethnicity groups persist, men of all other race/ethnicity groups other than Asian/Pacific Islander report a higher percentage of discrimination as a source of stress than White women. For example, more than one-third of male Native American (33.8\%), other (35.5\%), multiracial (35.2\%), Black (40.5\%), and Latino (44.1\%) faculty report discrimination as at least somewhat a source of stress. Greater differences emerge for women faculty. The percentages for women faculty of color range from $44.8 \%$ (Asian/Pacific Islander) to $60.2 \%$ (other race), multiracial (59.0\%), Black, and Latina (60.1\% each) faculty. In other words, more than half of female faculty of color consider discrimination a somewhat or extensive source of stress.

Of all institution types, women in STEM fields were most likely to consider discrimination at least somewhat of a source of stress at public universities. It is important to note, however, that women at public universities in non-STEM fields felt similar levels of stress from discrimination ( $43.0 \%$ and $43.3 \%$, respectively). By contrast, $13.1 \%$ of men in STEM fields and $22.7 \%$ of men in non-STEM fields at public universities consider discrimination at least somewhat a source of stress.

## Male and White faculty more likely to agree that women and faculty of color are treated fairly

Faculty are asked about their perceptions of institutional priorities, including the institutional commitment toward fostering a positive campus climate for diversity. Almost two-thirds (64.7\%) of faculty believed that their institution placed a high priority on developing a sense of community among students and faculty. Faculty
at private institutions (71.7\%) were more likely to believe that their institution placed a priority on community engagement between students and faculty than faculty at public institutions (60.1\%).

Faculty also had mixed perceptions regarding the recruitment and treatment of women and faculty of color at their institutions. Overall, roughly half (50.5\%) of faculty believed that their institution placed a high priority on promoting gender diversity in the faculty and administration. Additionally, slightly more than half of faculty (55.7\%) believed that their institution placed a high priority on promoting racial and ethnic diversity in the faculty and administration. There were variations in faculty perceptions based on race/ethnicity. Figure 2 shows that faculty who identified as Asian/ Pacific Islander (61.4\%) and White (56.7\%) were the most likely to believe the institution placed a high priority on promoting racial and ethnic diversity in the faculty and administration as compared to Native American (34.6\%), Black (43.1\%), and Latino/a faculty (47.7\%).

Faculty are also asked about their perceptions of the treatment of women and faculty of color. Men and women held different perceptions related to the treatment of female faculty at their institution. Overall, just over three-quarters (77.4\%) of faculty agreed that women faculty were treated fairly at their institution. Men (83.5\%) were much more likely than women ( $69.3 \%$ ) to agree with this statement. While faculty overall (79.3\%) believed that faculty of color were treated fairly at their institutions, Asian/Pacific Islander (83.8\%) and White (81.0\%) faculty were more likely to agree that faculty of color are treated fairly than their faculty peers who identify as Latino/a (58.8\%) or Black (61.4\%) (see Figure 2).

Figure 2. Campus Climate for Racial/Ethnic Diversity for Faculty, by Race/Ethnicity

## Legitimacy in scholarship: <br> Faculty of color and women perceive an uneven playing field

The peer review culture and pressure to achieve excellence in the areas of teaching, research, and service can foster feelings of uncertainty and doubt among some faculty regarding the adequacy of their productivity. Faculty who feel such uneasiness may feel as though they need to work even harder to keep up with their seemingly highly productive colleagues. Such feelings are often exacerbated among faculty from historically marginalized or vulnerable groups, including faculty of color, women, and those without the protections of tenure. Although half of all full-time faculty (51.0\%) felt they needed to work harder than their colleagues to be perceived as a legitimate scholar, agreement with this statement varied considerably by race/ethnicity, gender, and faculty rank.

More than three out of five women (61.0\%) believed they needed to work harder than their colleagues to be perceived as a legitimate scholar compared to just $43.6 \%$ of men. Disaggregating the data by race/ethnicity leads to even larger gaps between faculty of color and their White counterparts. For example, substantially more

Black (72.2\%), Asian (70.7\%), Latino/a (70.6\%), and Native American (66.7\%) faculty perceived a need to work harder than their peers to gain legitimacy compared to just $46.8 \%$ of White faculty who felt similarly.

The salience of race as a factor in explaining variation in faculty's responses to believing they needed to work harder than their colleagues becomes clear when examining intersections of race/ethnicity and gender. Almost without exception, rates of agreement among faculty of color, regardless of race, exceed the proportion of White male and female faculty who felt they needed to work harder than their colleagues to gain legitimacy. As shown in Figure 3, White men feel the least vulnerable among all racegender pairings with $39.0 \%$ believing they need to work harder than their colleagues to be perceived as a legitimate scholar. Similarly, among women, White faculty felt the least vulnerable, as just over half (57.3\%) agreed with the statement.

By contrast, substantially higher proportions of men and women faculty of color perceived a need to work harder than their colleagues to be thought of as legitimate scholars. Without exception, within each racial/ethnic group the

Figure 3. Feeling a Need to Work Harder Than Colleagues To Be Perceived as a Legitimate Scholar, by Race/Ethnicity and Gender
(\% Indicating "Agree Somewhat" or "Strongly Agree")

proportion of women expressing this belief exceeded that of men. The largest gender gap emerged among Native American faculty, as $97.7 \%$ of women agreed with this sentiment compared to $54.5 \%$ of men. Roughly 20 percentage points separated the proportion of Black ( $81.6 \%$ ) and Latina ( $81.4 \%$ ) women who agreed with this statement from their Black and Latino male colleagues ( $63.7 \%$ and $61.7 \%$, respectively). Asian/Pacific Islander faculty had the narrowest gender gap at 4.5 percentage points ( $73.7 \%$ of women and $69.2 \%$ of men felt they had to work harder than their colleagues to gain legitimacy).

Trying to gain legitimacy among colleagues by putting in longer hours may be triggered by uncertainty with respect to security of employment. Although just one in 10 faculty ( $10.4 \%$ ) experience "extensive" stress related to their job security, faculty who experience uncertainty at work are much more likely to think they need to work harder than their colleagues to be perceived as a legitimate scholar. Overall, three out of four faculty ( $76.2 \%$ ) reporting "extensive" stress associated with job security also indicated having a sense they needed to work harder than
their colleagues. Three in five faculty ( $60.0 \%$ ) feeling "somewhat" stressed with respect to security of employment agreed they needed to outwork their peers compared to just $42.8 \%$ of faculty who did not report feeling stressed about their job security. Nearly all Black ( $90.5 \%$ ), Asian/Pacific Islander (88.3\%), and multiracial (86.2\%) faculty who experienced "extensive" stress associated with their security of employment also felt compelled to work harder than their colleagues. Although less pronounced, the trend also applies to White ( $72.6 \%$ ) and Latino/a (72.7\%) faculty.

Another catalyst prompting perceptions of needing to exert more effort than one's colleagues may stem from a lack of clarity surrounding the promotion and tenure process. Compared to their peers who reported having a clear understanding of the criteria used in promotion and tenure decisions, faculty who lacked clarity on this issue were 1.5 times as likely to feel compelled to work harder than their colleagues ( $66.1 \%$ vs. $45.6 \%$ ).

As shown in Figure 4, seven out of 10 faculty (69.7\%) who strongly disagreed that criteria for promotion and tenure decisions were clear
also believed they needed to work harder than their colleagues to be perceived as a legitimate scholar. By contrast, $38.9 \%$ of faculty who "strongly agreed" they clearly understood policies surrounding promotion and tenure perceived a need to work harder than other faculty members, a difference of more than thirty percentage points. The discrepancies suggest that clearly communicated signals from the campus concerning expectations about faculty productivity could go a long way in alleviating anxiety and helping faculty better calibrate self-assessments of their contributions to the department, discipline, and institution.

Believing it is necessary to work harder than peers can also contribute to higher stress levels. Faculty who agreed either "somewhat" or "strongly" that they needed to work harder than their colleagues to be perceived as a legitimate scholar also reported experiencing "extensive" stress at higher rates than their colleagues who did not feel pressured to work harder than their peers. Overall, about one-quarter of fulltime undergraduate teaching faculty reported "extensive" stress due to increased responsibilities at work. One-third of faculty who believed they needed to work harder than their colleagues (33.0\%) experienced "extensive" stress due to increased work responsibilities compared to $18.6 \%$ of respondents who did not feel pressured to work harder than their peers.

Perceiving a need to work harder than others and acting upon those perceptions could certainly reduce the amount of personal time in faculty members' lives. One-third of faculty who

Figure 4. Perceiving a Need to Work Harder Than Colleagues To Be Perceived as a Legitimate Scholar, by Agreement That Criteria for Promotion and Tenure Are Clear (\% Marking "Agree Somewhat" or "Strongly Agree")

believed they needed to work harder than their colleagues ( $33.8 \%$ ) reported having fewer than five hours on average each week of "personal time" compared to $22.8 \%$ of respondents who did not share this concern. Not surprisingly, the proportion of faculty experiencing "extensive" stress due to a lack of personal time was twice as high among faculty who felt a need to outwork their peers compared to respondents who did not share this sentiment ( $34.3 \%$ vs. $16.7 \%$ ).

## Satisfaction with equity of salary and job benefits varies by race, gender, and primary responsibility

Overall, less than half of undergraduate teaching faculty (48.4\%) are satisfied or very satisfied with the relative equity of salary and job benefits. Just over one-quarter of faculty are marginally satisfied (26.5\%) and another quarter ( $25.1 \%$ ) are not satisfied. Further, faculty members at private universities are most likely (59.7\%) to be satisfied or very satisfied with the relative equity of salary and job benefits. Additionally, faculty members at public institutions are most likely to not be satisfied
(27.4\% at public universities and $28.2 \%$ at public four-year colleges).

Satisfaction with relative equity of salary and job benefits also varies by academic rank. Full professors are most likely to be satisfied or very satisfied (54.8\%), followed by assistant and associate professors ( $48.9 \%$ and $44.4 \%$, respectively), instructors (40.0\%), and finally lecturers ( $38.7 \%$ ). In fact more than one-third of those in lecturer titles (35.3\%) are not satisfied. Faculty whose principal activity is teaching (72.2\%) are less likely to be satisfied than those whose principal activity is service to clients/ patients (79.3\%), administration (82.6\%), or research (82.6\%).

Satisfaction with the relative equity of salary and job benefits varies by sex and race/ethnicity as well. In general female faculty ( $43.5 \%$ "Satisfied" or "Very Satisfied") are less satisfied with the relative equity of salary and job benefits than their male colleagues ( $52.1 \%$ ). Multiracial (39.2\%), Latino/a (39.8\%), Black (46.7\%), and Asian/Pacific Islander (47.1\%) are all less satisfied with the relative equity of salary and job benefits than their White peers (50.1\%).

However, Figure 5 shows that greater differences emerge when considering faculty satisfaction at the intersection of race/ethnicity and sex. Male faculty are more satisfied with the relative equity of salary and job benefits in all racial/ethnic groups except for Black faculty. The difference between men and women is most pronounced for Native American (more than 26 percentage points) and those who selected "Other" race (22 percentage points). The least pronounced difference between men and women within a race/ethnicity group exists for Asian/Pacific Islander faculty (<2 percentage points) and Black faculty, with male faculty 2.3 percentage points less satisfied ( $45.5 \%$ ) with the relative equity of salary and job benefits than their Black female colleagues (47.9\%)

Looking at satisfaction by STEM-affiliation, STEM faculty are more satisfied (52.6\% "Satisfied" or "Very Satisfied") than those not in STEM fields ( $46.5 \%$ ). However, there is much variation within these larger fields as faculty in the physical sciences (59.1\%), a STEM field, and social sciences (58.0\%), not a STEM field, are highest overall. This is true for those who

Figure 5. Satisfaction with Relative Equity of Salary and Job Benefits, by Race/Ethnicity and Sex (\% "Satisfied" or "Very Satisfied")

are not satisfied as well as $29.2 \%$ of biological sciences faculty (STEM) and 31.8\% of fine arts faculty (not STEM) are not satisfied.

Faculty are asked how many hours during the typical week they spend doing a variety of activities. Differences in amount of time teaching, preparing for teaching, and doing research/ scholarly writing were found by level of satisfaction with the relative equity of salary and job benefits. The 7-point scale for this item ranges from "none" (coded as 0 ) to 21 or more (coded as 6). Means for this item were calculated for each level of satisfaction of the salary and benefits equity variable.

In general, as shown in Figure 6, the level of satisfaction increased as the mean hours per week spent on teaching and preparing for teaching decreased. For example, faculty who were not satisfied had a mean of 2.56 on the hours per week scheduled teaching item (2 represents $1-4$ hours per week and 3 represents 5-8 hours

In general...the level of satisfaction increased as the mean hours per week spent on teaching and preparing for teaching decreased.
per week), while those who were very satisfied had a mean of 1.98 on the hours per week of scheduled teaching item. The same relationship is true for the hours per week preparing for teaching, which includes grading and reading students' papers. Those who were not satisfied with the relative equity of salary and job benefits had a mean of 3.11 , as compared to those who were very satisfied who had a mean of 2.60 . By contrast, as time spent doing research and

Figure 6. Satisfaction with the Relative Equity of Salary and Job Benefits, by Hours per Week Teaching, Preparing for Teaching, and Research/Scholarly Writing

scholarly writing increased, so did the level of satisfaction, though the differences weren't as large. Faculty who were not satisfied with equity salary and benefits had an average of 2.13 , while those who were very satisfied had an average of 2.26. It is interesting to note that those who were satisfied spent even more time on research and scholarly writing, with a mean of 2.45 .

Faculty believe they are not prepared to deal with diversity-related conflict in the classroom

The HERI Faculty Survey has several questions related to campus climate, some of which are dispersed throughout the core instrument while others can be found in an optional campus climate module. This section will focus specifically on items related to faculty perceptions of campus racial climate that are in the core survey.

While just over a quarter ( $27.0 \%$ ) of faculty felt that there was campus racial conflict at their institution; across both race/ethnicity and gender their perceptions varied. Women were

Over half of faculty respondents believed that faculty are not prepared to deal with conflict over diversity issues in the classroom.
more likely to agree that there was campus racial conflict at their institution. Approximately $31.2 \%$ of female faculty agreed while $23.7 \%$ of male faculty agreed. Figure 7 highlights the differences that emerge when analyzing this item by race/ethnicity. For example, almost half of Latino/a faculty (42.5\%) and 39.2\% of Black faculty agreed that there was a lot of racial conflict at their college or university. In contrast, only $25.0 \%$ of White faculty shared the same perception about racial conflict at their institution.

Figure 7. There Is a Lot of Campus Racial Conflict Here, by Race/Ethnicity (\% "Agree Somewhat" or "Strongly Agree")

Faculty influence on campus racial climate also exists within the domain of the classroom. Well over three-quarters of faculty agree ( $84.3 \%$ ) that it is their role to enhance students' knowledge of and appreciation for other racial/ethnic groups. However, over half of faculty respondents believed that faculty are not prepared to deal with conflict over diversity issues in the classroom. Figure 8 shows that when broken out by race/ethnicity, over two-thirds of Latino/a faculty ( $67.3 \%$ ) and slightly less than two-thirds of Black faculty ( $60.7 \%$ ) believed that faculty are unprepared to handle diversity-related conflict within the classroom.

Perhaps in order to address issues related to handling diversity-related conflict in the classroom, faculty could turn to resources aimed at integrating culturally-competent practices into their teaching. However, less than one-quarter of faculty (21.6\%) report utilizing resources to integrate culturally-competent practices into their classrooms. Faculty use of these resources also varied by academic discipline. About onethird of faculty in other technical fields (33.6\%), education (32.9\%), and the humanities (32.1\%) were the most likely to utilize resources to integrate culturally-competent practices in their classroom. By contrast, faculty in engineering
(7.2\%), mathematics/statistics (10.0\%), and agriculture/forestry (12.5\%) were least likely to do so.

Additionally, faculty are asked if they incorporate class materials related to racial diversity within their classes. Overall, less than one-third of faculty ( $30.9 \%$ ) frequently incorporate readings on racial and ethnic issues into most or all of their classes. Latino/a and Black faculty were more likely to incorporate readings on racial and ethnic issues into their classes with $51.9 \%$ of Latino/a faculty and $50.8 \%$ of Black faculty reporting they incorporate this type of reading most or all of the time. This is in contrast to $29.8 \%$ of White faculty and $22.6 \%$ of Asian/ Pacific Islander faculty who reported incorporating readings on race and ethnicity into their classes.

## Faculty have complex mentoring relationships with undergraduates, graduate students, and other faculty

Institutions participating in the HERI Faculty Survey have the opportunity to add a number of optional modules covering a range of topics such as spirituality, STEM, and campus climate. Revisions after the 2013-2014 Faculty Survey
administration resulted in a new optional module covering faculty experiences as mentors of undergraduates, graduate students, and other faculty. This module was completed by 7,255 full-time faculty at 56 institutions. This section presents selected unweighted findings from the mentoring module, by academic field and sex. The sample is $45.7 \%$ female and about one-third of the faculty ( $32.8 \%$ ) come from STEM fields.

In this module, faculty respondents are asked to rate their strength on a series of skills associated with mentoring. In general, female faculty (mean score 50.9, compared to 49.0 for male faculty) and faculty not in STEM fields (50.4, compared to 48.8 for STEM faculty) score higher on the mentor self-efficacy construct, which is a composite measure of these skills. The skills include providing mentees with constructive feedback, taking into account the biases and prejudices they bring to the mentor/
mentee relationship, working effectively with mentees whose personal backgrounds differ from their own, and being an advocate for their mentees.

Faculty respondents are also asked if they have participated in training in preparation to be a mentor (e.g., workshops, programs). More than half (57.6\%) have participated in such training, with STEM faculty (63.8\%) more likely to have participated in mentor training than their peers in other fields (54.6\%). Analyzing these self-rated mentoring skills by participation in training reveals that those who have participated in any mentor training consider some of these skills more of a strength than those who did not participate in the training (see Figure 9).

Figure 9 shows that the proportion of those who consider taking into account the biases they bring to the mentoring relationship (69.2\% and $60.3 \%$ ), working effectively with mentees whose personal background differs from their

Figure 9. Self-rated Mentoring Skills, by Mentor Training Participation
(\% Identifying as "Somewhat Strong" or "Major Strength")

Figure 10. Mentoring Activities with Undergraduates, by Sex (\% Selecting "To a Very Large Extent")
own (79.1\% and 69.9\%), providing constructive feedback to their mentees ( $84.6 \%$ and $74.6 \%$ ), and being an advocate for their mentees ( $86.4 \%$ and $75.5 \%$ ) as somewhat of a strength or a major strength is about 10 percentage points higher for those who participated in training to be a mentor than for those who did not.

The gap between the two groups increases for the self-rating for helping their mentees network effectively, with 67.1\% of those who have participated in training considering this at least somewhat of a strength, compared to just $50.8 \%$ of those who did not participate in mentor training.

## Mentoring Undergraduates

Of the faculty who are currently mentoring undergraduate students, about one-fifth each mentor one or two students (20.4\%), three or four students ( $18.2 \%$ ), five to eight students (20.6\%), nine to fifteen students (20.2\%), or 16 or more students (20.6\%). Faculty in non-STEM fields reported mentoring more undergraduates with $44.3 \%$ mentoring nine or more students, compared to $33.9 \%$ of STEM faculty.
Male and female faculty reported mentoring about the same number of students, but female faculty were more likely to rate the overall quality of their mentoring relationship with undergraduates as excellent ( $54.4 \%$ ) compared to $49.9 \%$ of their male peers. Further, while less likely to rate their mentoring relationships as excellent, male faculty were more likely to communicate with their undergraduate mentees at least weekly ( $69.2 \%$ ) than their female
colleagues ( $61.5 \%$ ). While the communication may not be as frequent, female faculty were more likely than male faculty to work on educational choices and strategies, explore career options, serve as a role model, and convey empathy (see Figure 10) to a very large extent with their undergraduate mentees, which emphasizes the importance of quality vs. quantity.

## Mentoring Graduate Students

Faculty in non-STEM fields report having more graduate student mentees than STEM faculty. Further, female faculty in both STEM and non-STEM fields are slightly more likely to have more students than their male peers. Just under one-third of female STEM faculty (32.9\%) have at least five graduate student mentees, compared to $29.8 \%$ of male STEM faculty. A slightly larger gap exists in non-STEM fields in which $44.4 \%$ of female faculty have at least five graduate student mentees compared to $38.4 \%$ of their male peers.
In non-STEM fields, about $10 \%$ of male ( $10.6 \%$ ) and female ( $9.1 \%$ ) faculty communicate daily with their graduate mentees. However in STEM fields, about $20 \%$ of female faculty (19.8\%) and one-third of male STEM faculty (33.0\%) communicate daily with the graduate

Figure 11. Faculty Mentoring Activities with Faculty Mentees, by Sex (\% Indicating "To a Large or Very Large Extent")

and review, tenure, and promotion. Male faculty are more likely to work with their faculty mentees on their research ( $42.0 \%$ ) than their female peers do (34.3\%). By contrast, female faculty are more likely to work on teaching with their faculty mentees (58.4\%) than male faculty ( $49.2 \%$ ).
student mentees. Male faculty in STEM fields (66.7\%) work with their graduate mentees on their research projects/interests to a very large extent at higher rates than female faculty in STEM fields (50.0\%) and both male and female faculty in non-STEM fields (48.6\% and $48.9 \%$, respectively).

## Mentoring Other Faculty

Of the faculty who completed the mentoring module, a little over a third ( $\mathrm{n}=2,581$ ) reported currently mentoring other faculty. For those who currently mentor other faculty members, just under half (46.2\%) report having one faculty mentee, $29.9 \%$ have two faculty mentees, $18.0 \%$ have three or four, and $5.8 \%$ have five or more. Female faculty are more likely than male faculty to have more than one faculty mentee (56.0\%, compared to $51.7 \%$ for male faculty).

Figure 11 shows the proportion of male and female faculty who work with their faculty mentees to a large extent or to a very large extent on their research; teaching;

Finally, over half of both male and female faculty ( $53.7 \%$ and $55.6 \%$, respectively) work on review, tenure, and promotion with their faculty mentees.

## Newer and non-STEM faculty more likely to recognize/acknowledge their role in student development

Previous iterations of the HERI Faculty Survey have asked faculty about their general goals for undergraduate education. This year faculty were asked more specifically about their role in helping undergraduates achieve these goals. As shown in Figure 12, there are significant differences across these items. For example, almost three-quarters (73.0\%) of faculty strongly agree that it is their responsibility to promote students' ability to write effectively, but only about a quarter ( $26.8 \%$ ) strongly believe they should provide for students' emotional development. Faculty are also more likely to strongly agree that they should prepare students for employment after college ( $69.2 \%$ ) and for graduate or advanced education ( $61.4 \%$ ) than to encourage students to become agents of social change (37.2\%), or develop students' personal values ( $37.0 \%$ ) and moral character ( $40.0 \%$ ). When it comes to diversity, $57.6 \%$ of faculty strongly agree that it is their role to

teach students tolerance and respect for different beliefs, and fewer, $44.3 \%$, strongly agree that they should enhance students' knowledge of and appreciation for other racial/ethnic groups.
For most of these goals, assistant professors were more likely than their tenured colleagues to strongly agree they play a role, most notably when it comes to enhancing students' knowledge of and appreciation for other racial ethnic groups. In this case, $37.7 \%$ of full professors and $43.9 \%$ of associate professors strongly felt they play a role, while half ( $50.7 \%$ ) of assistant professors felt this way, a 13 percentage point gap between assistant and full professors. Similar gaps were seen in helping students develop personal values ( $42.4 \%$ assistant, $32.2 \%$ associate, $34.1 \%$ full), providing for students' emotional development ( $30.9 \%$ assistant, $23.8 \%$ associate, $23.0 \%$ full), and developing students' moral character ( $46.0 \%$ assistant, $34.8 \%$ associate, $36.6 \%$ full). However, in promoting students' ability to write effectively,
full professors were more likely to feel strongly that they play a role, although the differences across rank were minimal: $75.3 \%$ of full professors compared to $73.5 \%$ of associates and $73.3 \%$ of assistants.
Faculty in non-STEM fields are more likely to strongly agree that they play a role in most of these goals for undergraduate education. The two exceptions are in preparing students for employment (76.3\% STEM vs. $66.4 \%$ non-STEM) and preparing students for graduate or advanced education ( $71.8 \%$ STEM vs. $57.1 \%$ non-STEM). Figure 13 also highlights significant gaps between STEM and non-STEM faculty on several of these goals. The largest gaps (each of which non-STEM faculty were more likely) can be seen when it comes to teaching students tolerance and respect for different beliefs ( 24.7 percentage point difference), enhancing students' knowledge of and appreciation for other racial/ethnic groups (23.7 percentage point difference), and

Figure 13. Faculty Roles in Undergraduate Education, by Non-STEM and STEM (\% Indicating "Strongly Agree")

in encouraging students to become agents of social change (19.7 percentage point difference); highlighting STEM faculty as much less likely to feel responsible for playing a role in diversity goals for undergraduates. The smallest gaps, or where non-STEM and STEM faculty were most likely to agree with each other, were when it comes developing students' moral character and providing for students' emotional development. It should be noted though, as mentioned earlier, fewer faculty in general feel strongly responsible for these last two goals.

## Faculty encourage students to be thoughtful and think critically

In the 2016-2017 administration of the HERI Faculty Survey, faculty were asked about their interactions with students in several areas. Figure 14 portrays some notable increases in faculty reporting their encouragement and interactions with students as compared to the 2013-2014 administration of the survey.

In a time when terms like "fake news" and "alternative facts" have inserted themselves into daily vernacular, perhaps faculty feel more pressure or an increasing need to teach students how to be critical consumers of what they read. Larger proportions of faculty have reported increases in frequency on three items relating to habits of mind. Overall, $69.1 \%$ of faculty reported frequently encouraging students to evaluate the quality or reliability of information that they receive, which is a difference of over ten percentage points from the previous administration in which $58.8 \%$ of faculty frequently did this. Additionally, almost three-quarters of faculty (73.4\%) report frequently encouraging students to seek solutions to problems and explain them to others, an increase of over five percentage points from the previous administration of the survey. Finally, over half of faculty ( $55.9 \%$ ) reported frequently encouraging students to recognize biases that affect their thinking, an increase of three percentage points from 2013-2014.

Figure 14. Change in Faculty Encouragement To Think and Act Critically, 2013-2014 to 2016-2017

Faculty were also asked questions related to their beliefs in preparing students for the future. Overwhelmingly, faculty felt that it was their job to prepare students for employment after college—nearly all (96.5\%) faculty respondents agreed. A slightly smaller, but still significant proportion of faculty (78.9\%), reported that the institution placed a priority on preparing students for the workplace. Additionally, 96.7\% of faculty felt that it was their job to prepare students for advanced graduate education.

## Majority of faculty identify as politically liberal, but not increasingly so

Since the appointment of Secretary of Education Betsy DeVos, there has been much attention paid to the liberal political affiliation of college faculty. Republicans have taken aim at college campuses, stating that professors in particular act as liberal socializing agents shaping, or even forcing, today's college students to accept their liberal beliefs or risk failure in college. While higher proportions of faculty respondents do identify as left-leaning on the political spectrum, a deeper analysis of political views over time tells a more nuanced story.

Overall in 2016-2017, 0.4\% of faculty identify as far right, $11.7 \%$ as conservative, $28.1 \%$ as middle-of-the-road, $48.3 \%$ as liberal, and $11.6 \%$ as far left.

## While higher proportions of faculty respondents do identify as left-leaning on the political spectrum, a deeper analysis of political views over time tells a more nuanced story.

While almost half of faculty (48.3\%) report identifying as liberal, these proportions mirror the proportions in previous administrations of this survey. For example, in 2013-2014, nearly the same proportion of faculty ( $48.8 \%$ ) reported identifying as liberal. The history of the HERI Faculty Survey allows us to investigate this trend over time, starting in 1989-1990 with the first administration of the survey in which roughly one-third (36.8\%) of faculty identified as liberal.

Figure 15. Faculty Liberal Political Views, by Year

That proportion steadily increased leveling out in 2010-2011 with roughly half of faculty (50.3\%) reporting liberal views. Since then, the proportion of faculty identifying as liberal has actually decreased by two percentage points. The public seems to hold the notion that there is an increasing trend related to the proportion of faculty who identify as liberal. However, our data indicate that this is not the case-for decades faculty have leaned toward the liberal side of political orientation. Figure 15 includes more information about the proportion of faculty identifying as liberal over time.

## Lecturers and instructors overrepresented in teaching remedial/developmental courses

Colleges and universities around the country are enrolling students who are not prepared for college-level coursework. Overall, 70.6\% of faculty agree somewhat or strongly that their institution takes responsibility for educating underprepared students. Asian/Pacific Islander
and White faculty ( $78.6 \%$ and $71.0 \%$, respectively) were most likely to agree, while Latino/a or Other race faculty were least likely to agree ( $64.0 \%$ and $63.4 \%$, respectively) that their institution takes responsibility for educating underprepared students.

There is a range of agreement on this item by institution type and control. Faculty at private universities ( $63.2 \%$ ) and nonsectarian fouryear colleges ( $70.1 \%$ ) were least likely to feel that their institution takes responsibility for educating underprepared students. Other religious colleges ( $75.3 \%$ ), public four-year colleges (72.9\%), and Catholic colleges (72.8\%) were most likely to agree with the statement.

Not surprisingly, faculty who are teaching remedial/developmental courses this term are more likely to agree that their institution takes responsibility for educating underprepared students. While $71.7 \%$ of faculty who are not teaching remedial/developmental courses this term agree that their institution takes responsibility for educating underprepared students, $79.2 \%$ of those teaching one to two
and $81.0 \%$ of those teaching three or more remedial/developmental courses this term feel the same. Further, faculty teaching remedial/ developmental courses are also more likely to agree that the students they teach lack the basic skills for college level work. Just over onethird ( $34.9 \%$ ) of faculty not currently teaching remedial/developmental courses, about six out of ten ( $60.5 \%$ ), and over two-thirds ( $68.3 \%$ ) of those teaching three or more developmental/ remedial courses this term agree somewhat or agree strongly that most of the students they teach lack the basic skills for college level work.

Roughly five percent of undergraduate teaching faculty are teaching at least one remedial/developmental course this term. Faculty members at Catholic colleges (2.6\%) and private universities (3.2\%) were least likely to be teaching remedial/developmental courses this term, while those at public four-year colleges (5.3\%) and public universities (5.8\%)
were most likely to be doing so. Respondents in lecturer and instructor titles ( $9.0 \%$ and $10.4 \%$, respectively) are more likely to be currently teaching any remedial/developmental courses than assistant (3.3\%), associate (4.4\%), and full (5.5\%) professors. Remedial/developmental courses were most likely being taught by faculty in mathematics/statistics (12.5\%) or other technical fields (18.0\%) and least likely being taught by faculty in social sciences ( $0.8 \%$ ), history/ political science (1.2\%), or humanities (1.2\%).

Professional development opportunities to improve classroom performance and student learning are often available to faculty. However, one in five faculty members who are not eligible to take advantage of resources to integrate culturally-competent practices into their classroom are teaching at least one remedial class this term (see Figure 16), compared to the 7.8\% of faculty who took advantage of these opportunities. Further, $16.3 \%$ of those who are not

eligible to take advantage of funded workshops focused on teaching are teaching at least one remedial class this term, compared to the 5.5\% of faculty who took advantage of these opportunities. Perhaps these opportunities should be made available to those faculty who are teaching remedial/developmental courses.

## Just half of undergraduate teaching faculty participated in teaching-related professional development opportunities

The 21 st century has seen an increase in the demands and scrutiny that faculty in the United States face in terms of their teaching practices, ability to finance their research, and overall productivity (Altbach, 2016). As faculty in both private and public four-year institutions encounter more obstacles to obtaining tenure-track positions, more competition to secure grants, and internal/external pressures to innovate their teaching, faculty development has become a vital component necessary for their professional growth. The 2016-2017 HERI Faculty Survey results indicate that a majority of faculty ( $69.2 \%$ ) agree that there is adequate support for faculty development. Faculty working at private institutions are slightly more likely to agree with this statement than those at public institutions ( $71.3 \%$ vs. $67.7 \%$, respectively). Surprisingly, $75.7 \%$ of instructors agree with this statement at a higher percentage than faculty in other academic ranks ( $67.9 \%$ of full professors, $64.3 \%$ of associate professors, $73.8 \%$ of assistant professors, and $71.4 \%$ of lecturers).

A further examination of faculty who participated in professional development activities over the last year reveals the type of professional development opportunities offered to faculty. In terms of participation in professional development activities that focus on teaching, $50.3 \%$
of faculty indicated "yes," 44.0\% "no," and $5.7 \%$ stated that these types of programs were not available or they were not eligible for them at their institution. In terms of race/ethnicity, Native American (60.6\%) were most likely to have participated in teaching-related professional development activities, followed by White (52.0\%), Latino/a (51.7\%), Black/African American (49.4\%), Other (47.0\%), and Asian/ Pacific Islander (44.9\%).

## Faculty development has become a vital component necessary for their professional growth.

Figure 17 shows that faculty who participated in teaching-related professional development activities were more likely to report receiving course-related incentives and resources. For example, one-quarter ( $25.7 \%$ ) of faculty who participated in teaching-related professional development activities received incentives to develop new courses. By contrast, roughly $10 \%$ of all other faculty, regardless of whether these opportunities were available at their institution, did so. Further, more than a third of faculty who participated in teaching-related professional development received incentives to integrate technology into the classroom and resources to integrate culturally-competent practices into their classroom ( $34.6 \%$ and $33.5 \%$, respectively). The proportions for other faculty range from about $9-14 \%$. It is important to note that it is not known whether these incentives were tied to their participation in these teachingrelated professional development activities.

Figure 17. Course-related Resources, by Participation in Teaching-related Professional Development Activities

When it comes to professional development that helped faculty with seeking out funding for their research, $18.0 \%$ of faculty participated in workshops/activities that focused on research skills development, $12.8 \%$ participated in grant-writing activities, and $34.7 \%$ engaged in professional development activities that focused on internal grants for research.

| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| During the past three years, have you: |  |  |  |  |  |  |  |
| Taught an honors course | 20.7 | 25.0 | 18.9 | 14.9 | 19.2 | 23.3 | 17.7 |
| Taught an interdisciplinary course | 41.6 | 41.2 | 43.9 | 35.0 | 51.9 | 39.6 | 44.4 |
| Taught an area studies course (e.g., women's studies, ethnic studies, LGBTQ) | 13.9 | 11.4 | 15.8 | 13.5 | 21.0 | 17.5 | 14.1 |
| Taught a service learning course | 17.1 | 15.2 | 17.1 | 19.0 | 17.9 | 22.1 | 18.4 |
| Taught a course exclusively online | 23.1 | 20.6 | 11.8 | 38.2 | 15.9 | 27.1 | 28.3 |
| Participated in organized activities around enhancing pedagogy or student learning | 67.8 | 62.9 | 65.6 | 71.7 | 72.4 | 75.8 | 78.4 |
| Taught a seminar for first-year students | 23.1 | 19.7 | 26.0 | 19.5 | 34.7 | 24.2 | 29.2 |
| Participated in the development of curriculum (enhancing an existing course) | 86.9 | 84.5 | 86.1 | 89.3 | 89.7 | 89.9 | 89.9 |
| During the past three years, have you: (\% marking "to a very large extent") |  |  |  |  |  |  |  |
| Presented with undergraduate students at conferences | 6.3 | 7.6 | 6.0 | 5.5 | 5.4 | 5.0 | 4.3 |
| Published with undergraduates | 3.4 | 3.8 | 4.8 | 2.5 | 2.9 | 2.2 | 1.7 |
| Engaged undergraduates on your research project(s) | 17.3 | 21.1 | 19.8 | 12.8 | 13.9 | 14.7 | 9.2 |
| Worked with undergraduates on their research project(s) | 18.5 | 19.2 | 19.4 | 15.7 | 23.4 | 16.1 | 15.6 |
| How would you rate the overall experience of working with undergraduates on research projects? |  |  |  |  |  |  |  |
| Excellent | 23.0 | 23.2 | 29.0 | 19.3 | 24.4 | 20.7 | 17.8 |
| Good | 42.8 | 43.7 | 44.9 | 41.0 | 42.7 | 39.8 | 40.1 |
| Fair | 13.8 | 15.5 | 10.1 | 14.0 | 12.6 | 14.0 | 14.4 |
| Poor | 1.6 | 1.6 | 1.1 | 1.8 | 1.5 | 2.0 | 2.1 |
| I have not worked with undergraduates on research projects | 18.8 | 16.0 | 14.9 | 24.0 | 18.9 | 23.5 | 25.6 |
| How many undergraduates do you currently advise? |  |  |  |  |  |  |  |
| Mean | 7.38 | 6.19 | 7.57 | 7.74 | 8.83 | 9.02 | 9.54 |
| Median | 6 | 4 | 7 | 8 | 12 | 12 | 12 |
| Mode | 1 | 1 | 1 | 1 | 12 | 12 | 12 |
| During the past year, how "frequently" did you do the following for your advisees? |  |  |  |  |  |  |  |
| Informed them of academic support options (e.g., study skills advising, financial aid advising, Writing Center, Disability Resource Center) | 49.9 | 46.9 | 43.6 | 51.9 | 58.8 | 61.0 | 55.1 |
| Helped them to plan their course of study | 63.2 | 48.8 | 64.6 | 67.5 | 80.3 | 84.4 | 82.5 |
| Discussed their academic performance | 56.6 | 51.4 | 53.4 | 57.5 | 68.2 | 71.0 | 62.4 |
| Provided information on other academic opportunities (e.g., study abroad, internships, undergraduate research) | 54.2 | 47.3 | 59.4 | 55.2 | 60.3 | 66.0 | 57.4 |
| Discussed career and post-graduation goals | 70.3 | 69.9 | 69.3 | 70.8 | 70.0 | 73.6 | 71.5 |
| During the past year, did you take advantage of any of the following professional development opportunities provided by this institution? |  |  |  |  |  |  |  |
| Paid workshops outside the institution focused on teaching |  |  |  |  |  |  |  |
| Yes | 50.3 | 45.6 | 50.4 | 55.7 | 49.1 | 55.2 | 59.7 |

## APPENDIX A

## Research Methodology

## RESEARCH METHODOLOGY

The data reported here have been weighted to provide a normative picture of the American college full-time undergraduate faculty. This Appendix provides a brief overview of the HERI methodology and describes the procedures used to weight the 2016-2017 HERI Faculty Survey results to produce the national normative estimates.

## The National Population

In order to weight the HERI Faculty Survey, we considered all institutions of higher education admitting at least 25 first-time full-time students and granting a baccalaureate-level degree or higher. Institutions also had to have responded to the 2015-2016 Human Resources Survey from the U.S. Department of Education's Integrated Postsecondary Education Data System (IPEDS). In 2016, this population included 1,512 institutions. It should be noted that the population reflects institutions of "higher education," rather than "postsecondary education," and that most proprietary, special vocational or semiprofessional institutions are not currently included in the population.

## Institutional Stratification Design

The institutions identified as part of the national population were divided into 17 stratification groups based on type (four-year college, university), control (public, private nonsectarian,

Roman Catholic, other religious), and selectivity (defined as the median SAT Verbal and Math scores [or ACT composite score] of the first-time first-year students).

HERI made adjustments to the stratification of institutions for the purposes of calculating the population weight for the 2016-2017 Faculty Survey administration. These adjustments reduced the granularity with which selectivity differentiates institutions within control and type. In several type-control cells, two rather than three levels of selectivity stratify the institutional sample. HERI relies on IPEDS data in its stratification process and specifically draws from the 2010 Basic Carnegie Classification measure, which defines "university" as "research universities" or "doctoral/research universities."

Having stratified the population by these institutional characteristics, IPEDS data was used to compute the male and female full-time undergraduate faculty (FTUG) population by academic rank (professor, associate professor, assistant professor, and all other ranks) in each stratification cell. These population counts form the target counts of the weighting procedure.

## Identifying the Norms Sample

For a participating institution's data to be included in the normative sample, HERI required that a minimum percentage of all FTUG faculty at that institution be surveyed. Participating four-year colleges were required to
have responses from at least $35 \%$ of their FTUG faculty. Participating universities were required to have responses from at least $20 \%$ of their fulltime faculty. ${ }^{1}$

The institutional participation rate should not be confused with response rate. An institution's response rate depends on the number of sampled faculty returned. If the institution sampled only a small proportion of its full-time undergraduate faculty, it might not meet the norms requirements of the above stated percentage of all full-time undergraduate faculty even if it had a very high response rate.

## The 2016-2017 Data

Although 33,798 respondents at 151 colleges and universities returned their forms in time for their data to be included in the norms, the normative data presented here are based on responses from 20,771 FTUG faculty from 143 baccalaureate institutions that fit the above norms sample criteria.

## Weighting the Sample

In order to approximate as closely as possible the results that would have been obtained if all college and university teaching faculty in all institutions had responded to the survey, a two stage weighting procedure was employed. It should be noted that the first stage of the weighting procedure is based on the assumption that the population of which the weights are an estimate is the total number of FTUG faculty at each institution.

[^1]
## First Weight

The FTUG faculty at each participating institution were sorted into eight categories representing combinations of gender (male or female) and rank (professor, associate professor, assistant professor, and all other ranks). The ratio between the total number of faculty in the institution and the number of respondents in each category was used as the first weight. This within-institution weight, which is designed to correct for any response bias related to the gender or rank of the faculty member, adjusts the total number of respondents up to the total number of faculty at each participating institution. ${ }^{2}$

## Second Weight

The second weight was designed to correct for between-stratification cell differences in institutional participation. To develop the second set of weights, institutions were sorted into 17 stratification cells based upon type (four-year college, university), control (public, private-nonsectarian, Roman Catholic, other religious), and selectivity. Within each of these stratification cells, faculty in all institutions in the population were sorted into the same eight gender-by-rank categories described above. Each cell had two values: (1) denominator-the weighted sum of the norms sample of FTUG faculty respondents, and (2) numerator-the total FTUG faculty counts from IPEDS. The ratio of the total FTUG counts and weighted respondent count became the second weight.

[^2]
## Final Weight

The third and final weight is simply a product of the first and second weights. Weighting each response in the norms sample brings the counts of full-time undergraduate faculty up to the national number in each stratification cell (see Table A1).

## Defining Full-time Undergraduate Faculty

Only those full-time employees who were engaged in teaching undergraduates were included in the normative data reported here. Part-time employees, full-time researchers, or faculty members who teach only at the postgraduate level have been excluded. More specifically, a respondent was included in the normative data if one of the following conditions were met: 1) Responded "yes" or did not respond as to whether they were a full-time
employee (question 6) and indicated that they taught at least one undergraduate-level course (i.e. general education course, course required for undergraduate major, other undergraduate credit course, developmental/remedial course [not for credit], or non-credit course [other than above]—question 10a). 2) Responded "yes" that they were a full-time employee (question 6) and indicated that they primarily taught undergraduate credit courses (question 10c). 3) Did not respond that they were a full-time employee (question 6) and responded that they taught no courses this term or did not respond to the number of courses for this survey item (question 10) and indicated that they primarily taught undergraduate credit courses (question 10c) and indicated that they were scheduled to teach nine hours or more hours per week during the present term (question 23).

Table A1. 2016 CIRP Freshman Survey National Norms Sample and Population

| Institution Type | Strat Cell | Selectivity |  | Institutions |  |  | Full-time Undergraduate Faculty |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Level | Average Score | Population | Survey | Norms Sample | Population | Sur <br> Survey | Sample <br> In Norms |
| Public | 1,2 | low/medium | 600-1200 | 138 | 13 | 7 | 142,943 | 2,726 | 1,740 |
| Universities | 3 | high | 1201-1600 | 38 | 6 | 5 | 72,211 | 2,816 | 2,146 |
| Private | 4 | medium | 600-1120 | 27 | 10 | 10 | 7,303 | 1,935 | 1,437 |
| Universities | 5,6 | high/very high | 1121-1600 | 69 | 6 | 6 | 83,720 | 2,617 | 1,886 |
| Public 4-year | 7,8,10 | low/medium | 600-1035 | 265 | 5 | 5 | 64,231 | 1,647 | 1,157 |
| Colleges | 9 | high | 1036-1600 | 91 | 9 | 9 | 33,848 | 2,111 | 1,877 |
| Private | 11,15 | low | 600-985 | 86 | 5 | 5 | 8,270 | 293 | 226 |
| Nonsectarian | 12 | medium | 986-1075 | 79 | 6 | 6 | 9,378 | 678 | 530 |
| 4-year | 13 | high | 1076-1190 | 63 | 6 | 6 | 9,512 | 731 | 630 |
| Colleges | 14 | very high | 1191-1600 | 81 | 19 | 19 | 16,106 | 2,991 | 2,790 |
| Catholic 4-year | 16,17,19 | low/medium | 600-1110 | 105 | 10 | 9 | 10,749 | 783 | 682 |
| Colleges | 18 | high | 1111-1600 | 44 | 7 | 7 | 10,420 | 1,218 | 1,046 |
| Other | 20,24 | very low | 600-1020 | 145 | 6 | 6 | 10,103 | 369 | 313 |
| Religious | 21 | low | 1021-1050 | 66 | 5 | 5 | 4,887 | 448 | 407 |
| 4-year | 22 | medium | 1051-1120 | 100 | 11 | 11 | 10,938 | 748 | 648 |
| Colleges | 23 | high | 1120-1600 | 75 | 23 | 23 | 11,591 | 3,175 | 2,792 |
| Predominantly Black Colleges | $\begin{gathered} 38,39, \\ 40,41 \end{gathered}$ | private |  | 40 | 4 | 4 | 4,398 | 624 | 464 |
| All Institutions |  |  |  | 1,512 | 151 | 143 | 510,608 | 25,910 | 20,771 |

Note:
-The broad categories of Institution Control (i.e., public, private, and religious affiliation) are defined by data submitted to Integrated Postsecondary Educational Data System (IPEDS).
-Universities are those institutions defined by 2010 Basic Carnegie Classification as "Research Universities" or "Doctoral/Research Universities."
-Selectivity is based on median SAT Verbal + Math scores and/or ACT composite scores of the entering class as reported to IPEDS. Other comparable sources (e.g., Common Data Set) are used for institutions not reporting SAT/ACT scores to IPEDS. Institutions with unknown selectivity are grouped with the low-selectivity institutions when computing National Norms.
The stratification design presented here is used to group schools to develop population weights and should not be used as a measure of institutional or program quality.
-Cell Weights are the ratio between the number of first-time, full-time freshmen enrolled in all colleges and the number of first-time, full-time freshmen enrolled in the norms sample colleges.
-Two-year colleges are not included in the norms sample.

## CIRP Constructs

CIRP Constructs represent sets of related survey items that measure an underlying trait or aspect of the faculty experience. Item Response Theory (IRT), a modern psychometric method that has several advantages over methods used in more traditional factor analysis, is used to create a construct score for each respondent. (Sharkness, DeAngelo, \& Pryor, 2010; Sharkness \& DeAngelo, 2011). Computing an individual's construct score in IRT involves deriving a maximum likelihood score estimate based on the pattern of the person's responses to the entire set of survey items for that construct (or to a sub-set of the items that were answered). Items that tap into the trait more effectively are given greater weight in the estimation process (see Table A2). A respondent's construct score is thus not a simple arithmetic mean or weighted sum, but rather the estimated score that is most likely, given how the student answered the set of items. CIRP Constructs are scored on a Z-score metric and rescaled for a mean of approximately fifty and standard deviation of ten. The low, average, and high construct score group percentages and the mean for the construct are reported here. Low scores represent students who are one-half standard deviation below the mean or
lower. Average scores represent students whose scores are within one-half standard deviation of the mean. High scores represent students who are one-half standard deviation or more above the mean. Please visit HERI's website for more detailed information about CIRP Constructs.

Table A2. List of HERI Faculty Survey Constructs (including survey items and estimation 'weights')

Student-Centered Pedagogy-Measures the extent to which faculty use student-centered teaching and evaluation methods in their course instruction.
In how many of the courses that you teach do you use each of the following?

- Cooperative learning (small groups) (2.30)
- Reflective writing/journaling (1.37)
- Student presentations (1.85)
- Group projects (1.82)
- Experiential learning/Field studies (1.30)
- Class discussions (1.70)
- Using student inquiry to drive learning (1.26)
- Student evaluations of each others' work (1.53)

Undergraduate Education Goal: Personal Development-Measures the extent to which faculty believe that personal development is a central goal for undergraduate education.
Indicate the importance to you of each of the following education goals for undergraduate students:

- Help students develop personal values (4.28)
- Develop moral character (3.42)
- Provide for students' emotional development (2.15)

Scholarly Productivity-A unified measure of the scholarly activity of faculty.
How many of the following have you published?

- Articles in academic and professional journals (3.09) - Chapters in edited volumes (2.11)
- How many of your professional writings have been published or accepted for publication in the last three years (2.53)
Civic Minded Practice-A unified measure of faculty involvement in civic activities.
- Collaborated with the local community in research/teaching (2.17)
- Community service as part of coursework (1.53)
- Community or public service (1.33)
- Engaged in public service/professional consulting without pay? (1.24)

Civic Minded Values-A unified measure of the extent to which faculty believe civic engagement is a central part of the college mission.

- Encourage students to become agents of social change (2.77)
- Colleges have a responsibility to work with their surrounding communities
- Enhance students' knowledge of and appreciation for other to address local issues (1.25)

Job Satisfaction: Workplace-A unified measure of the extent to which faculty are satisfied with their working environment.
How satisfied are you with the following aspects of your job?

- Autonomy and independence (1.46)
- Flexibility in relation to family matters or emergencies (3.05)
- Departmental leadership (1.09)
- Leave policies (2.40)
- Relative equity of salary and job benefits (1.29)

Job Satisfaction: Compensation-A unified measure of the extent to which faculty are satisfied with their compensation packages
How satisfied are you with the following aspects of your job?

- Opportunity for scholarly pursuits (2.38) • Teaching load (1.22)
- Retirement benefits (1.68) • Health benefits (2.04)
- Salary (1.39)
- Prospects for career advancement (1.53)

Table A2. List of HERI Faculty Survey Constructs (continued)
(including survey items and estimation 'weights')

## Career Related Stress-Measures the amount of stress faculty experience related to their career.

Please indicate the extent to which each of the following has been a source of stress for you during past year:

- Lack of personal time (1.96)
- Research or publishing demands (1.06)
- Teaching load (1.51)
- Self-imposed high expectations (1.03)
- Committee work (1.38)
- Students (1.08)

## Institutional Priority: Commitment to Diversity-Measures the extent to which faculty believe their institution is committed to creating a

stitutional Priority: Comed tape (1.08) diverse multicultural campus environment
Indicate how important you believe each priority listed below is at your college or university:

- To promote gender diversity in the faculty and administration (3.34) - To recruit more minority students (1.77)
- To promote racial and ethnic diversity in the faculty and
administration (5.72)
Institutional Priority: Civic Engagement—Measures the extent to which faculty believe their institution is committed to facilitating civic engagement among students and faculty
Indicate how important you believe each priority listed below is at your college or university:
- To provide resources for faculty to engage in community-based
- To facilitate student involvement in community service (1.56)
teaching or research (2.08)
- To create and sustain partnerships with surrounding communities (2.84)
nstitutional Priority: Increase Prestige—Measures the extent to which faculty believe their institution is committed to increasing its prestige.
Indicate how important you believe each priority listed below is at your college or university:
- To increase or maintain institutional prestige (3.54)
- To increase the selectivity of the student body through more competitive admissions criteria (3.43)
Diversity Climate-Measure representing faculty's perspectives about the climate for faculty members from diverse backgrounds.
Indicate how important you believe each priority listed below is at your college or university:
- This institution has effective hiring practices and policies that increase - Women faculty are treated fairly here (4.67)
faculty diversity (1.45)
- LGBTQ faculty are treated fairly here (3.17)
- This institution takes responsibility for educating underprepared
- Faculty of color are treated fairly here (5.13)

Respect-Composite measure representing the extent to which faculty feel their contributions are respected or appreciated by their colleagues.
Respect-Composite measure representing the extent to which faculty feel their contributions are respected or appreciated by their colleag
Indicate how important you believe each priority listed below is at your college or university:

- My research is valued by faculty in my department (2.32)
My teaching is valued by faculty in my department (5.73)
- Faculty here respect each other (1.14)

## APPENDIX B

## 2016-2017 HERI <br> Faculty Survey Questionnaire

## 2016-2017 HERI Faculty Survey Questionnaire

NOTE: The 2016-2017 HERI Faculty Survey is a web-based survey and therefore this document does not reflect the web-based formatting.

1. In what year did you receive your first academic appointment? (Dropdown responses: Years)
2. In what year were you first appointed at this institution? (Dropdown responses: Years)
3. What is your present academic rank?

Professor
Associate Professor
Assistant Professor
Lecturer
Instructor
Graduate Student/Teaching Assistant
Graduate Students/Teaching Assistants see questions noted [GTA]
4. What is your tenure status at this institution?

Tenured
On tenure track, but not tenured
Not on tenure track, but institution has tenure system
Institution has no tenure system
IF TENURED, NESTED ITEM
4a. In what year did you receive tenure at this institution?
(Dropdown responses: Years)
COMMUNITY COLLEGE
These questions will only be included for community colleges, and will replace questions 3 and 4 when the survey is used by community colleges.
3. What is your current status at this institution?

Tenured
Probationary, Tenure Track
Renewable Contract Instructor (e.g., Adjunct)
IF TENURED, NESTED ITEM
3a. In what year did you receive tenure at this institution?
(Dropdown responses: Years)
4. What is your academic rank at this institution?

Instructor
Assistant Professor
Associate Professor
Professor
5. Are you retired from this institution?

Yes No
Retired faculty see questions noted [RF]
6. Are you considered a full-time employee of your institution for at least nine months of the current academic year?

Yes No

## PART-TIME FACULTY

These questions will only be included for part-time faculty.
6a. If given the choice, I would prefer to work full-time at this institution.
Yes No
6b. Have you ever sought a full-time teaching position at this or another institution?
Yes No
IF YES, NESTED ITEM
6bi. How long ago did you pursue a full-time position?
Currently seeking a position
Within the last year
1 to 2 years ago
3 to 5 years ago
More than 5 years ago
6 c. Is your full-time professional career outside academia?
Yes No
6 d . In considering your reasons for teaching part-time at this institution, please indicate your agreement with the following statements:
(Responses: Strongly Agree, Somewhat Agree, Disagree Somewhat, Disagree Strongly)
My part-time position is an important source of income for me
Compensation is not a major consideration in my decision to teach part-time
Part-time teaching is a stepping-stone to a full-time position
My part-time position provides benefits (e.g., health insurance, retirement)
that I need
Teaching part-time fits my current lifestyle
Full-time positions were not available
My expertise in my chosen profession is relevant to the course(s) I teach
6e. Mark all institutional resources available to you in your last term as part-time faculty.
(Mark all that apply) [GTA]
Use of private office
Shared office space
A personal computer
An email account
A phone/voicemail
Professional development funds
Printer access (i.e., free printing)
6f. Please indicate your agreement with the following statements:
(Responses: Strongly Agree, Somewhat Agree, Disagree Somewhat, Disagree Strongly)
Part-time instructors at this institution:
Are given specific training before teaching
Rarely get hired into full-time positions
Receive respect from students
Are primarily responsible for introductory classes
Have no guarantee of employment security
Have access to support services
Are compensated for advising/counseling students
Are required to attend meetings
Have good working relationships with the administration
Are respected by full-time faculty
Are paid fairly
Have input in course designs
Are included in faculty governance
6 g . Aside from this institution, at how many other institutions do you teach? [GTA]
(Dropdown responses: $0,1,2,3,4,5,6,7,8,9,10$ or more)
6 h . For the current term, how far in advance of the beginning of the term did you receive your course assignments? [GTA]

Less than 1 week
1-2 weeks
3-4 weeks
1-3 months
More than 3 months
7. Your sex: [GTA] [RF]

Male Female
8. What is your principal activity in your current position at this institution? (Mark one) Administration
Teaching
Research
Services to clients and patients Other
9. Personally, how important to you is:
(Responses: Essential, Very Important, Somewhat Important, Not Important)
Research
Teaching
Service
10. How many courses are you teaching this term (include all institutions at which you teach)? [GTA] [RF]
(Dropdown responses: $0,1,2,3,4,5,6,7,8,9,10$ or more)
If response to question 10 is greater than or equal to one, the respondent sees 10a and 10b 10a. How many of the courses that you are teaching this term are: [GTA] [RF]
(Dropdown responses: $0,1-2,3-4,5-6,7+$ )
General education courses
Courses required for an undergraduate major
Other undergraduate credit courses
Developmental/remedial courses (not for credit)
Graduate courses
10b. How many of these courses that you are teaching this term are being taught: [GTA] [RF]
(Dropdown responses: 0, 1-2, 3-4, 5-6, 7+)
At this institution
At another institution
If response to question 10 is zero or missing, the respondent sees 10 c
10c. What types of courses do you primarily teach? (Mark one) [GTA] [RF]
Undergraduate credit courses
Graduate courses
Developmental/remedial courses
I do not teach
11. In the past year, have you worked with or taught undergraduate students at this institution? [RF]

Yes No
12. In the past year, have you worked with or taught graduate students at this institution? [RF]

Yes No

These questions will only be included for respondents indicating they have worked with or taught graduate students in Question 12.

12a. In the past year, to what extent have you: [RF]
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent,
To a Small Extent, Not at All)
Met with graduate students to discuss their research interests
Mentored graduate students
Helped graduate students access professional networks
Presented with graduate students at conferences
Published with graduate students
Included graduate students in research grant writing

12b. In the past year: [RF]
(Dropdown response options: $0,1,2,3,4,5,6,7,8,9,10,11$ or more)
How many master's thesis committees have you served on or are currently serving?
How many dissertation committees have you served on or are currently serving?
IF master's thesis committees >0 NESTED ITEM
12bi. In the past year, how many of these master's thesis committees have you chaired or are currently chairing? [RF]
(Dropdown response options: $0,1,2,3,4,5,6,7,8,9,10,11$ or more)
IF dissertation committees >0 NESTED ITEM
12bii. In the past year, how many of these dissertation committees have you chaired or are currently chairing? [RF]
(Dropdown response options: $0,1,2,3,4,5,6,7,8,9,10,11$ or more)
12c. In the past year, how many letters of recommendation have you written for graduate students? [RF]
(Dropdown response options: $0,1-5,6-10,11-15,16-20,21-25,26-30,31$ or more)
12d. Rate your agreement with the following statements:
(Responses: Strongly Agree, Somewhat Agree, Disagree Somewhat, Disagree Strongly)
Graduate students in this program must compete for research opportunities
It is important for graduate students to spend at least one term as a teaching assistant to develop teaching skills
This graduate program enrolls too few international students
Graduate students work well together in this program
I have encountered instances of academic dishonesty among graduate students
Graduate students in this program are trained to conduct research responsibly and ethically
Graduate students in this program receive adequate instruction on becoming good teachers
Faculty in my department are good mentors for graduate students
Most graduate students in this program move on to faculty positions
Most graduate students in this program move into positions outside of academia
13. During the past three years, have you: (Mark one for each item) [RF]
(Responses: Yes, No)
Advised student groups involved in service/volunteer work
Collaborated with the local community on research/teaching to address their needs
Conducted research or writing focused on:
International/global issues
Racial or ethnic minorities
Women or gender issues
Lesbian, Gay, Bisexual, Transgender, Queer (LGBTQ) issues
Biomedical science fields
Engaged in academic research that spans multiple disciplines
Engaged in public discourse about your research or field of study (e.g., blog, media interviews, op-eds)
Written research grants
Received funding for your work from:
Foundations
State or federal government
Business or industry
14. During the past three years, have you: (Mark one for each item) [RF] [GTA]
(Responses: Yes, No)
Taught an honors course
Taught an interdisciplinary course
Taught an area studies course (e.g., women's studies, ethnic studies, LGBTQ studies)
Taught a service learning course
Taught a course exclusively online
Participated in organized activities around enhancing pedagogy or student learning
Taught a seminar for first-year students
Participated in the development of curriculum (enhancing an existing course or creating a new course)
15. In the past year, to what extent have you:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent, Not at All)

Presented with undergraduate students at conferences
Published with undergraduates
Engaged undergraduates on your research project(s)
Worked with undergraduates on their research project(s)
16. How would you rate the overall experience of working with undergraduates on research projects?

Excellent
Good
Fair
Poor
I have not worked with undergraduates on research projects
17. How many undergraduates do you currently advise?

Dropdown responses:

| 0 | 7 | $41-50$ |
| :--- | :--- | :--- |
| 1 | 8 | $51-60$ |
| 2 | 9 | $61-70$ |
| 3 | 10 | $71-80$ |
| 4 | $11-20$ | $81-90$ |
| 5 | $21-30$ | $91-100$ |
| 6 | $31-40$ | 101 or more |

If advise undergraduates $=0$, skip to Q19
18. During the past year, how often have you done each of the following with your undergraduate advisees?
(Responses: Frequently, Occasionally, Not at All)
Informed them of academic support options (e.g., study skills advising, financial aid advising, Writing Center, Disability Resource Center)
Helped them to plan their course of study
Discussed their academic performance
Provided information on other academic opportunities (e.g., study abroad, internships, undergraduate research)
Discussed career and post-graduation goals
19. During the past year, have you taken advantage of any of the following professional development opportunities provided by this institution?
(Responses for each item in each column: Yes, No, Not Eligible, Not Available)
Funded workshops focused on:
Teaching
Research skills development
Grant writing
Paid sabbatical leave
Travel funds paid by the institution
Internal grants for research
Training for administrative leadership
Incentives to develop new courses
Incentives to integrate technology into your classroom
Resources to integrate culturally-competent practices into your classroom
20. How many of the following have you published? [RF] [GTA]
(Responses: None, 1-2, 3-4, 5-10, 11-20, 21-50, 51+)
Articles in academic or professional journals
Chapters in edited volumes
Books, manuals, or monographs
Other (e.g., patents, computer software products)
21. In the past three years, how many exhibitions or performances in the fine or applied arts have you presented? [RF] [GTA]
(Responses: None, 1-2, 3-4, 5-10, 11-20, 21+)
IF >0 NESTED ITEM
21a. How many of these exhibitions or performances were: [RF] [GTA]
(Responses: None, 1-2, 3-4, 5-10, 11-20, 21+)
Solo/Individual
Collaborative
22. In the past three years, how many of your professional writings have been published or accepted for publication? [RF] [GTA]
(Dropdown responses: $0,1,2,3,4,5,6,7,8,9,10,11,12,13,14,15,16,17,18,19,20,21+$ )
IF >0 NESTED ITEM
22a. How many of these professional writings were: [RF] [GTA]
(Dropdown responses: $0,1,2,3,4,5,6,7,8,9,10,11,12,13,14,15,16,17,18,19$, 20, 21+)

Solo-authored
Co-authored
23. During the present term, how many hours per week on average do you spend on each of
the following?
(Responses: None, 1-4, 5-8, 9-12, 13-16, 17-20, 21+)
Scheduled teaching (give actual, not credit hours)
Preparing for teaching (including reading student papers and grading)
Advising or counseling students
Committee work and meetings
Research and scholarly writing
Other creative products/performances
Community or public service
Outside consulting/freelance work
Household/childcare duties
Serving as a caregiver for another adult
Other employment, outside of academia
Personal time (e.g., exercise, hobbies, relaxing)
24. In your interactions with undergraduates, how often in the past year did you encourage them to: (Mark one for each item) [GTA]
(Responses: Frequently, Occasionally, Not at All)
Ask questions in class
Support their opinions with a logical argument
Seek solutions to problems and explain them to others
Analyze multiple sources of information before coming to a conclusion
Evaluate the quality or reliability of information they receive
Take risks for potential gains
Seek alternative solutions to a problem
Look up scientific research articles and resources
Explore topics on their own, even though it was not required for a class
Accept mistakes as part of the learning process
Recognize biases that affect their thinking
25. How frequently in the courses you taught in the past year have you given at least one assignment that required students to: [GTA]
(Responses: Frequently, Occasionally, Not at All)
Write in the specific style or format of your discipline
Describe how different perspectives would affect the interpretation of a question or issue in your discipline
Discuss the ethical or moral implications of a course of action
Apply mathematical concepts and computational thinking
26. In how many of the courses that you teach do you use each of the following? [GTA]
(Responses: All, Most, Some, None)
Class discussions
Cooperative learning (small groups)
Experiential learning/Field studies
Performances/Demonstrations
Group projects
Extensive lecturing
Multiple drafts of written work
Reflective writing/Journaling
Community service as part of coursework
Electronic quizzes with immediate feedback in class
Using real-life problems
Using student inquiry to drive learning
27. In how many of the courses that you teach do you use each of the following? [GTA]
(Responses: All, Most, Some, None)
Readings on racial and ethnic issues
Readings on women or gender issues
Supplemental instruction outside of class and office hours
Student presentations
Student evaluations of each others' work
Grading on a curve
Rubric-based assessment
Flipping the classroom (i.e., students must watch/listen to instructional content before class, while class time is used for projects, assignments, and discussions)
28. How frequently do you incorporate the following forms of technology into your courses? [GTA]
(Responses: Frequently, Occasionally, Not at All)
Videos or podcasts
Simulations/animations
Online homework or virtual labs
Online discussion boards
Audience response systems to gauge students' understanding (e.g., clickers)
29. Please indicate the extent to which you agree it is your role to:
(Responses: Strongly Agree, Somewhat Agree, Disagree Somewhat, Disagree Strongly)
Encourage students to become agents of social change
Prepare students for employment after college
Prepare students for graduate or advanced education
Develop students' moral character
Provide for students' emotional development
Help students develop personal values
Enhance students' knowledge of and appreciation for other racial/ethnic groups
Promote students' ability to write effectively
Teach students tolerance and respect for different beliefs
30. Please indicate your agreement with each of the following statements: (Responses: Strongly Agree, Somewhat Agree, Disagree Somewhat, Disagree Strongly)

The chief benefit of a college education is that it increases one's earning power
A racially/ethnically diverse student body enhances the educational experience of all students
Colleges have a responsibility to work with their surrounding communities to address local issues
Private funding sources often prevent researchers from being completely objective in the conduct of their work
I try to dispel perceptions of competition
I achieve a healthy balance between my personal life and my professional life
I feel that I have to work harder than my colleagues to be perceived as a legitimate scholar
31. Below are some statements about your college or university. Indicate the extent to which you agree or disagree with each of the following: (Mark one for each item) [RF]
(Responses: Strongly Agree, Somewhat Agree, Disagree Somewhat, Disagree Strongly)
This institution has effective hiring practices and policies that increase faculty diversity
Student Affairs staff have the support and respect of faculty
There is a lot of campus racial conflict here
My research is valued by faculty in my department
My teaching is valued by faculty in my department
My service is valued by faculty in my department
Faculty are sufficiently involved in campus decision making
The faculty are typically at odds with campus administration
Faculty here respect each other
Administrators consider faculty concerns when making policy
This institution takes responsibility for educating underprepared students
The criteria for advancement and promotion decisions are clear
Most of the students I teach lack the basic skills for college level work
There is adequate support for faculty development
Faculty are not prepared to deal with conflict over diversity issues in the classroom
This institution takes mentoring into consideration in the promotion process
Faculty of color are treated fairly here
Women faculty are treated fairly here
LGBTQ faculty are treated fairly here
32. Indicate how important you believe each priority listed below is at your college or university: [RF]
(Responses: Highest Priority, High Priority, Medium Priority, Low Priority)
Increase or maintain institutional affordability
Develop a sense of community among students and faculty
Facilitate student involvement in community service
Help students learn how to bring about change in society
Increase or maintain institutional prestige
Hire faculty "stars"
Recruit more traditionally underrepresented students
Increase the selectivity of the student body through more competitive admissions criteria
Promote gender diversity in the faculty and administration
Promote racial and ethnic diversity in the faculty and administration
Provide resources for faculty to engage in community-based teaching or research
Create and sustain partnerships with surrounding communities
Pursue extramural funding
Strengthen links with the for-profit, corporate sector
Develop leadership ability among students
Develop an appreciation for multiculturalism
Prepare students for the workplace
33. Please indicate the extent to which you:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent, Not at All)

Feel that the training you received in graduate school prepared you well for your role as a faculty member
Experience close alignment between your work and your personal values
Mentor faculty
Mentor undergraduate students
Mentor graduate students
Been mentored by at least one professional in academia
Participated in training in preparation to be a mentor (e.g., workshops, programs)
Accessed the National Research Mentoring Network (NRMN) resource
IF Mentor faculty is >Not at All, NESTED ITEM
33a. How would you rate the overall quality of your mentoring relationship with your faculty mentee(s)?
(Responses: Excellent, Good, Fair, Poor)
IF Mentor undergraduate students is >Not at All, NESTED ITEM
33b. How would you rate the overall quality of your mentoring relationship with your undergraduate mentee(s)?
(Responses: Excellent, Good, Fair, Poor)
IF Mentor graduate students is >Not at All, NESTED ITEM
33c. How would you rate the overall quality of your mentoring relationship with your graduate mentee(s)?
(Responses: Excellent, Good, Fair, Poor)
34. How satisfied are you with the following aspects of your job? (Mark one for each item) (Responses: Very Satisfied, Satisfied, Marginally Satisfied, Not Satisfied)

Salary
Health benefits
Retirement benefits
Opportunity for scholarly pursuits
Teaching load
Quality of students
Autonomy and independence
Departmental leadership
Departmental support for work/life balance
Institutional support for work/life balance
Prospects for career advancement
Relative equity of salary and job benefits
Flexibility in relation to family matters or emergencies
Leave policies (e.g., paternity/maternity leave, caring for a family member, stopping the tenure clock)
Overall job
35. Please indicate the extent to which each of the following has been a source of stress for you during the past year: (Mark one for each item)
(Responses: Extensive, Somewhat, Not at All, Not Applicable)
Managing household responsibilities
Child care
My physical health
Review/promotion process
Discrimination (e.g., prejudice, racism, sexism, homophobia, transphobia)
Committee work
Faculty meetings
Students
Research or publishing demands
Institutional procedures and "red tape"
Teaching load
Lack of personal time
Job security
Self-imposed high expectations
Increased work responsibilities
Institutional budget cuts
36. Have you been sexually harassed at this institution? [GTA] [RF] (Responses: Yes, No)
37. In the past year, have you:
(Responses: Yes, No)
Considered leaving academe for another job
Considered leaving this institution for another
Engaged in public service/professional consulting without pay
Received at least one firm job offer elsewhere
Sought an early promotion
38. For each of the following items, please mark either Yes or No. (Responses: Yes, No)

Are you a member of a faculty union?
Do you plan to retire within the next three years?
Have you ever interrupted your professional career for more than one year for family reasons?
Have you ever been formally recognized for outstanding teaching at this institution?
39. Citizenship status: (Mark one) [RF] [GTA]
U.S. citizen

Permanent resident (green card)
Temporary, non-immigrant visa holder (i.e., J-1, H-1B, TN, T-3, O-1)
None of the above
40. How would you characterize your political views? (Mark one) [RF] [GTA]

Far Left
Liberal
Middle-of-the-Road
Conservative
Far Right
41. If given the choice, would you: [RF]
(Responses: Definitely Yes, Probably Yes, Not Sure, Probably No, Definitely No)
Still come to this institution?
Still be a college professor?
42. Please select your base institutional salary.

Dropdown responses:
Less than \$10,000 \$60,000-69,999 \$150,000-199,999
$\$ 10,000-19,999 \quad \$ 70,000-79,999 \quad \$ 200,000-249,999$
\$20,000-29,999 \$80,000-89,999 \$250,000-499,999
$\$ 30,000-39,999 \quad \$ 90,000-99,999 \quad \$ 500,000$ or higher
\$40,000-49,999 \$100,000-124,999
\$50,000-59,999 \$125,000-149,999
43. Your base institutional salary reported above is based on: (Mark one)

Less than 9 months
9/10 months
11/12 months

## PART-TIME FACULTY

These questions will replace questions 42 and 43 for faculty who indicate they are part-time.
42. Please select your total salary from teaching at this institution for this academic year. Dropdown responses:

Less than \$5,000 \$5,000-9,999 \$10,000-14,999 \$15,000-19,999 \$20,000-24,999 \$25,000-29,999
\$30,000-34,999 \$35,000-39,999 \$40,000-44,999 \$45,000-49,999 \$50,000-59,999 \$60,000-69,999
\$70,000-79,999
\$80,000-89,999
\$90,000-99,999
\$100,000 or more
43. How much are you paid per course at this institution? [GTA] Dropdown responses:

| Less than $\$ 500$ | $\$ 4,000-4,499$ | $\$ 8,000-8,499$ |
| :--- | :--- | :--- |
| $\$ 500-999$ | $\$ 4,500-4,999$ | $\$ 8,500-8,999$ |
| $\$ 1,000-1,499$ | $\$ 5,000-5,499$ | $\$ 9,000-9,499$ |
| $\$ 1,500-1,999$ | $\$ 5,500-5,999$ | $\$ 9,500-9,999$ |
| $\$ 2,00-2,999$ | $\$ 6,000-6,499$ |  |
| $\$ 2,500-2,999$ | $\$ 3,500-6,999$ |  |
| $\$ 3,000-3,499$ | $\$ 7,000-7,499$ |  |
| $\$ 3,500-3,999$ | $\$ 7,500-7,999$ |  |

44a. Please select the most appropriate general area for the following: [RF] [GTA]
(See Appendix A)
Major of highest degree held
Department of current faculty appointment
44b. Please select the most appropriate disciplinary field for the following: [RF] [GTA] (See Appendix A)

Major of highest degree held
Department of current faculty appointment
45. Please mark the highest degree you have earned: (Mark one) [RF] [GTA]

Bachelor's (B.A., B.S., etc.)
Master's (M.A., M.S.)
Terminal Master's (M.F.A., M.B.A.)
J.D.
M.D., D.D.S., D.V.M., etc. (Medical)

Ph.D.
Professional Doctorate (Ed.D., Psy.D., etc.)
Other
46. Please mark the degree you are currently working on: (Mark one) [GTA]

Bachelor's (B.A., B.S., etc.)
Master's (M.A., M.S.)
Terminal Master's (M.F.A., M.B.A.)
J.D.
M.D., D.D.S., D.V.M., etc. (Medical)

Ph.D.
Professional Doctorate (Ed.D., Psy.D., etc.)
Other
None
47. Are you currently serving in an administrative position as: (Mark all that apply)

Department chair
Dean (including Associate or Assistant)
Vice-President
President
Provost
Other
Not Applicable
48. Are you: (Mark all that apply) [RF] [GTA]

White/Caucasian
African American/Black
American Indian/Alaska Native
East Asian (e.g., Chinese, Japanese, Korean, Taiwanese)
Filipino
Southeast Asian (e.g., Cambodian, Vietnamese, Hmong)
South Asian (e.g., Indian, Pakistani, Nepalese, Sri Lankan)
Other Asian
Native Hawaiian/Pacific Islander
Mexican American/Chicano
Puerto Rican
Other Latino
Other
49. Is English your primary language? [RF] [GTA]

Yes No
50. What is your sexual orientation? (Mark one) [RF] [GTA]

Heterosexual/Straight
Gay
Lesbian
Bisexual
Queer
Other
51. Do you identify as transgender? (Mark one) [RF] [GTA]

No
Yes, male to female
Yes, female to male
52. Are you currently: (Mark one) [RF] [GTA]

Single
In a civil union
In a domestic partnership
Married
Unmarried, living with partner
Separated
Divorced
Widowed
53. How many children do you have in the following age ranges? [RF] [GTA]
(Responses: 0, 1, 2, 3, 4+)
Under 18 years old
18 years or older
IF "Under 18" is >0, NESTED ITEM
53a. How satisfied are you with the availability of child care at this institution? [RF] [GTA] (Responses: Very Satisfied, Satisfied, Marginally Satisfied, Not Satisfied, Not Applicable)
54. Please select the four-digit year of your birth. [RF] [GTA]

Dropdown responses:

| 1998 or later | 1984 | 1970 | 1956 | 1942 | 1928 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1997 | 1983 | 1969 | 1955 | 1941 | 1927 |
| 1996 | 1982 | 1968 | 1954 | 1940 | 1926 |
| 1995 | 1981 | 1967 | 1953 | 1939 | 1925 |
| 1994 | 1980 | 1966 | 1952 | 1938 | 1924 |
| 1993 | 1979 | 1965 | 1951 | 1937 | 1923 |
| 1992 | 1978 | 1964 | 1950 | 1936 | 1922 |
| 1991 | 1977 | 1963 | 1949 | 1935 | 1921 |
| 1990 | 1976 | 1962 | 1948 | 1934 | 1920 |
| 1989 | 1975 | 1961 | 1947 | 1933 | 1919 |
| 1988 | 1974 | 1960 | 1946 | 1932 | 1918 |
| 1987 | 1973 | 1959 | 1945 | 1931 | 1917 |
| 1986 | 1972 | 1958 | 1944 | 1930 | 1916 or earlier |
| 1985 | 1971 | 1957 | 1943 | 1929 |  |

Complete the following if directed.

## Campus Climate Module

1. Please indicate the extent to which you agree or disagree with the following statements.

This institution:
(Strongly Agree, Somewhat Agree, Disagree Somewhat, Disagree Strongly)
Lacks strategic diversity goals and plans
Has a long-standing commitment to diversity
Has standard reporting procedures for incidents of harassment or discrimination
2. Please indicate how often at this institution you have:
(Very Often, Often, Sometimes, Seldom, Never)
Assisted a student who had experienced discrimination
Counseled a student who had been sexually assaulted
Witnessed discrimination
Reported an incident of discrimination to a campus authority
Reported an incident of sexual harassment to a campus authority
Been discriminated against or excluded from activities because of my: Race/ethnicity
Gender
Sexual orientation
Other identity
Heard insensitive or disparaging racial remarks
Heard insensitive or disparaging remarks about women
Heard insensitive or disparaging comments about LGBTQ individuals
3. How satisfied are you with the following aspects of your institution?
(Very Satisfied, Satisfied, Neutral, Dissatisfied, Very Dissatisfied)
Atmosphere for political differences
Atmosphere for religious differences
Atmosphere for differences in sexual orientation
Administrative response to:
Incidents of discrimination
Reports of sexual assault
Student concerns about exclusion or marginality
4. Please rate your satisfaction with your department in each area:
(Very Satisfied, Satisfied, Neutral, Dissatisfied, Very Dissatisfied)
Collegiality among faculty
Tolerance of different faculty opinions and beliefs
Representation of women faculty
Representation of racial/ethnic minority faculty
Acceptance of differences in sexual orientation
Student respect for my role in the classroom

## Mentoring Module

1. How would you rate yourself as a mentor in the following areas:
(Responses: A Major Strength, Somewhat Strong, Average, Somewhat Weak, A Major Weakness)
Providing constructive feedback to your mentees
Taking into account the biases and prejudices you bring into the mentor/mentee relationship
Working effectively with mentees whose personal background is different from your own (age, race, gender, class, religion, sexual orientation, etc.)
Being an advocate for your mentees
Helping your mentees network effectively
Helping your mentees acquire financial resources (e.g., scholarships, fellowships, grants)
Please answer the following questions about mentoring undergraduate students.
2. How many undergraduate students do you currently mentor?
(Dropdown responses: $0,1,2,3,4,5,6,7,8,9,10,11-15,16-20,21-25,26-30,31$ or more) IF =0, skip to Q6
3. How often do you typically communicate with your undergraduate mentee(s)?

Daily
Weekly
Monthly
Once per term
Yearly
4. To what extent do you work with your undergraduate mentees on the following:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent,
Not at All)
Educational choices and strategies
Their research projects and interests
5. To what extent have you:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent, Not at All)
Explored career options with your undergraduate mentee(s)
Served as a role model to your undergraduate mentee(s)
Gone out of your way to promote your undergraduate mentees' academic interests
Conveyed empathy for concerns or feelings your undergraduate mentees have discussed with you
Please answer the following questions about mentoring graduate students.
6. How many graduate students do you currently mentor?
(Dropdown responses: $0,1,2,3,4,5,6,7,8,9,10,11-15,16-20,21-25,26-30,31$ or more) IF =0, skip to Q10
7. How often do you typically communicate with your graduate mentee(s)?

Daily
Weekly
Monthly
Once per term
Yearly
8. To what extent do you work with your graduate mentees on the following:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent, Not at All)
Educational choices and strategies
Their research projects and interests
9. To what extent have you:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent, Not at All)
Explored career options with your graduate mentee(s)
Served as a role model to your graduate mentee(s)
Gone out of your way to promote your graduate mentees' academic interests
Conveyed empathy for concerns or feelings your graduate mentees have discussed with you

Please answer the following questions about mentoring faculty.
10. How many faculty members do you currently mentor at this institution?
(Dropdown responses: 0, 1, 2, 3, 4, 5, 6-10, 11 or more)
IF $=0$, skip to end of module
11. How often do you typically communicate with your faculty mentee(s)?

Daily
Weekly
Monthly
Once per term
Yearly
12. To what extent do you work with your faculty mentee(s) on the following:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent, Not at All)
Their research
Their teaching
Their review, tenure, and promotion
13. To what extent have you:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent, Not at All)
Served as a role model to your faculty mentee(s)
Conveyed empathy for concerns or feelings your faculty mentees have discussed with you

## Spirituality Module

1. Indicate the importance to you of each of the following educational goals for undergraduate students:
(Responses: Essential, Very Important, Somewhat Important, Not Important)
Enhancing spiritual development
Facilitating the search for meaning/purpose in life
Becoming more conversant with different religious traditions
Becoming more conversant with different spiritual practices
2. Indicate the extent to which you:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent, Not at All)
Engage in self-reflection
Consider yourself a religious person
Consider yourself a spiritual person
Engage in prayer
Engage in meditation
Seek opportunities to grow spiritually
Encourage discussion of religious and spiritual matters among students
Engage in discussion of religious and spiritual matters with students
3. Please indicate your agreement with each of the following statements:
(Responses: Strongly Agree, Somewhat Agree, Disagree Somewhat, Disagree Strongly)
Colleges should be concerned with facilitating undergraduate students' spiritual development
The spiritual dimension of faculty members' lives has no place in the academy
I am conflicted about my religious/spiritual beliefs
I follow the religious/spiritual beliefs of this institution
4. Indicate the importance to you personally of each of the following:
(Responses: Essential, Very Important, Somewhat Important, Not Important)
Integrating spirituality into my life
Serving as a spiritual/religious advisor to students

## STEM Module

**Items in this module will only be seen by faculty who indicate they teach in STEM using set of predetermined rules regarding departmental affiliation.**

1. In the courses you have taught in the past year, how often do you:
(Responses: Always, Frequently, Occasionally, Rarely, Never)
Integrate authentic (i.e., not "cookbook") research experiences into labs Incorporate mini-labs into lecture
2. In the STEM courses you have taught in the past year, how often do you encourage students to:
(Responses: Always, Frequently, Occasionally, Rarely, Never)
Use technical science skills (use of tools, instruments, and/or techniques)
Generate a research question
Determine how to collect appropriate data
Explain the results of a study
Use scientific literature to guide research
Integrate results from multiple studies
Ask relevant questions
Identify what is known and not known about a problem
Understand scientific concepts
See connections between different areas of science and mathematics
3. To what extent are the following statements true of you: (Mark one in each row)
(Responses: Strongly Agree, Somewhat Agree, Neutral, Disagree Somewhat,
Disagree Strongly)
I have a strong sense of belonging to a community of scientists
I derive great personal satisfaction from working on a team that is doing important research
I think of myself as a scientist
I feel like I belong in the field of science
4. To what extent do you structure your STEM courses so that students:
(Responses: To a Very Large Extent, To a Large Extent, To Some Extent, To a Small Extent,
Not at All)
Develop a stronger interest in STEM disciplines
Have the foundational knowledge for advanced study in STEM

## APPENDIX D

The Precision of the Normative Data and Their Comparisons

## THE PRECISION OF THE NORMATIVE DATA AND THEIR COMPARISONS

A common question asked about sample surveys relates to the precision of the data, which is typically reported as the accuracy of a percentage "plus or minus x percentage points." This figure, which is known as a confidence interval, can be estimated for items of interest if one knows the response percentage and its standard error.

Given the CIRP's large normative sample, the calculated standard error associated with any particular response percentage will be small (as will its confidence interval). It is important to note, however, that traditional methods of calculating standard error assume conditions which, (as is the case with most real sample survey data), do not apply here. Moreover, there are other possible sources of error which should be considered in comparing data across normative groups, across related item categories, and over time. In reference to the precision of the CIRP data, these concerns include:

1) Traditional methods of calculating standard error assume that the individuals were selected through simple random sampling. Given the complex stratified design of the CIRP, where whole institutions participate, it is likely that the actual standard errors will be somewhat larger than the standard error estimates produced through traditional computational methods. In addition, while every effort has been made to maximize the comparability of the institutional sample from year to year (repeat participation runs
about 90 percent), comparability is reduced by non-repeat participation and year-to-year variation in the quality of data collected by continuing institutional participants. While the CIRP stratification and weighting procedures are designed to minimize this institutional form of "response bias," an unknown amount of non-random variation is introduced into the results.
2) The wording of some questions in the survey instrument, the text and number of response options, and their order of presentation have changed over the years. We have found that even small changes can produce large order and context effects. Given this, the exact wording and order of items on the survey instrument (see Appendix B) should be examined carefully prior to making comparisons across survey years.
3) Substantial changes in the institutional stratification scheme were made in 1968, 1971, 1975, 2001, and 2009. These changes resulted in a revision of the weights applied to individual institutions. Stratification cell assignments of a few institutions may also change from time to time, but the scale of these changes and their effect on the national normative results are likely to be small in comparison to other sources of bias.

Since it is impractical to report statistical indicators for every percentage in every CIRP comparison group, it is important for those who
are interested to be able to estimate the precision of the data. Toward this end, Table D1 provides estimates of standard errors for comparison groups of various sizes and for different percentages ${ }^{1}$ which can be used to derive confidence interval estimates.

For example, suppose the item we are interested in has a response percentage of 15.7 percent among students at all nonsectarian fouryear colleges (a normative group that is 28,272 in size). First, we choose the column that is closest to the observed percentage 15.7-in this case " $15 \%$." ${ }^{2}$ Next, we select the row closest to the unweighted sample size of 28,272—in this case "20,000." Consulting Table D1, we find the estimated standard error would be .252 .

To calculate the confidence interval at the $95 \%$ probability level, we multiply the estimated standard error by the critical value of $t$ for the unweighted sample size (which, for all CIRP comparison groups, will be equal to 1.96 at the .05 level of probability). ${ }^{3}$ In this example, we would multiply the estimated standard error of .252 by 1.96 , which yields .494 . If we round this figure to a single decimal point we would then estimate our confidence interval to be 15.7 $\pm .5$. In practical terms, this confidence interval means that if we were to replicate this survey using the same size sample, we would expect that the resulting percentage would fall between 15.2 percent and 16.2 percent 95 times out of 100 .

Table D1. Estimated Standard Errors of Percentages for Comparison Groups of Various Sizes

| Unweighted size of comparison groups | Percentage |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1\% | 5\% | 10\% | 15\% | 20\% | 25\% | 30\% | 35\% | 40\% | 45\% | 50\% |
| 500 | . 445 | . 975 | 1.342 | 1.597 | 1.789 | 1.936 | 2.049 | 2.133 | 2.191 | 2.225 | 2.236 |
| 1,000 | . 315 | . 689 | . 949 | 1.129 | 1.265 | 1.369 | 1.449 | 1.508 | 1.549 | 1.573 | 1.581 |
| 5,000 | . 141 | . 308 | . 424 | . 505 | . 566 | . 612 | . 648 | . 675 | . 693 | . 704 | . 707 |
| 10,000 | . 099 | . 218 | . 300 | . 357 | . 400 | . 433 | . 458 | . 477 | . 490 | . 497 | . 500 |
| 20,000 | . 070 | . 154 | . 212 | . 252 | . 283 | . 306 | . 324 | . 337 | . 346 | . 352 | . 354 |
| 40,000 | . 050 | . 109 | . 150 | . 179 | . 200 | . 217 | . 229 | . 238 | . 245 | . 249 | . 250 |
| 55,000 | . 042 | . 093 | . 128 | . 152 | . 171 | . 185 | . 195 | . 203 | . 209 | . 212 | . 213 |
| 70,000 | . 038 | . 082 | . 113 | . 135 | . 151 | . 164 | . 173 | . 180 | . 185 | . 188 | . 189 |
| 90,000 | . 033 | . 073 | . 100 | . 119 | . 133 | . 144 | . 153 | . 159 | . 163 | . 166 | . 167 |
| 110,000 | . 030 | . 066 | . 090 | . 108 | . 121 | . 131 | . 138 | . 144 | . 148 | . 150 | . 151 |
| 130,000 | . 028 | . 060 | . 083 | . 099 | . 111 | . 120 | . 127 | . 132 | . 136 | . 138 | . 139 |
| 240,000 | . 020 | . 044 | . 061 | . 073 | . 082 | . 088 | . 094 | . 097 | . 100 | . 102 | . 102 |

Note: Assumes simple random sampling.
${ }^{1}$ Calculated by $\sqrt{\frac{\mathrm{x} \%(100-\mathrm{x} \%)}{\mathrm{N}}}$ where x is the percentage of interest and N is the population count from Table A1.
${ }^{2}$ Since the distribution of the standard errors is symmetrical around the 50 percent mid-point, for percentages over 50 simply subtract the percentage from 100 and use the result to select the appropriate column. For example, if the percentage we were interested in was $59,100-59$ percent yields 41 , so we would use the column labeled ' $40 \%$.'
${ }^{3}$ To calculate the confidence interval at the $99 \%$ probability level the critical t value is 2.56 .

## ABOUT THE AUTHORS

Ellen Bara Stolzenberg is the Assistant Director for Research at the Higher Education Research Institute at UCLA. Dr. Stolzenberg's responsibilities within HERI include helping institutions use CIRP data in their long-term assessment plans and the accreditation process; representing CIRP as a presenter and exhibitor at national and regional conferences; and contributing to monographs, infographics, and research briefs summarizing the surveys and highlighting key issues in higher education. Her research interests include students in transition, disciplinary culture, student-faculty interaction, and graduate education.

Kevin Eagan is an Assistant Professor and the Director of the Cooperative Institutional Research Program (CIRP). He is also the Director of the Higher Education Research Institute (HERI), where the CIRP surveys are administered. His research interests include issues related to undergraduate science, technology, engineering, and mathematics (STEM) education, contingent faculty, student retention, institutional contexts and structures of opportunity, survey validity and reliability, and advanced quantitative methods.

Hilary B. Zimmerman recently graduated from the Higher Education and Organizational Change program at UCLA. She is now a Research Associate in the Office of Institutional Effectiveness at Loyola University Chicago. Her research interests include leadership, civic engagement, and assessment and evaluation in higher education.

Jennifer Berdan Lozano is a doctoral candidate in the Higher Education and Organizational Change program at UCLA's Graduate School of Education and Information Studies. She is a research analyst for UCLA's Center for Educational Assessment, and was previously a research analyst for HERI. Her research interests include faculty, gender, and organizational and cultural change.

Natacha M. Cesar-Davis is a doctoral student in the Higher Education and Organizational Change program at UCLA's Graduate School of Education and Information Studies and a research analyst for the Higher Education Research Institute. Her research interests include community colleges, in particular faculty and student interactions at these institutions and online education.

Melissa C. Aragon is the Assistant Director of Operations at the Higher Education Research Institute at UCLA. Her responsibilities include overseeing survey administration processes, survey project management, and publication production.

Cecilia Rios-Aguilar is an Associate Professor of Education and the Associate Dean for Equity and Inclusion in the Graduate School of Education and Information Studies at the University of California Los Angeles. Her research interests include quantitative research methods, big data, social media, community colleges, and educational policies.

## Completing College:

Assessing Graduation Rates at Four-Year Institutions
November, 2011/55 pages
Provides latest information on four-, five-, and six-year degree attainment rates collected longitudinally from 356 baccalaureate-granting institutions. Differences by institutional type, gender, first-generation status and race/ethnicity are examined. The study highlights main predictors of degree completion and provides several formulas for calculating expected institutional completion rates.

## The American Freshman: National Norms for Fall 2016* 2016/79 pages

E-book with expanded table/175 pages
Provides national normative data on the characteristics of students attending American colleges and universities as first-time, full-time freshmen. In 2016, data from 137,456 entering first-year students are statistically adjusted to reflect the 1.5 million students entering college. The annual report covers: demographic characteristics; expectations of college; degree goals and career plans; college finances; and attitudes, values and life goals.
*Note: Publications from earlier years are also available.

The American Freshman:
Fifty-Year Trends, 1966-2015
June, 2016/155 pages
E-book with expanded tables/343 pages
Summarizes trends data in the Cooperative Institutional Research Program (CIRP) Freshman Survey between 1966 and 2015. The report examines changes in the diversity of students entering college; emotional well-being and drive to achieve; students' financial concerns and sources of financial aid; and the role of early admissions in college choice. Trends in students' political and social attitudes are also covered.

## Undergraduate Teaching Faculty:

The 2016-2017 HERI Faculty Survey*
February, 2019/111 pages
E-book with expanded tables/207 pages
Provides an informative profile of teaching faculty at American colleges and universities. The 2016-2017 report covers discrimination as a source of stress; satisfaction with salary and job benefits; faculty role in promoting critical thinking amongst students; and overrepresentation of lecturers and instructors teaching remedial/development courses. Results are reported by institutional type for all faculty, male faculty, and female faculty.
*Note: Publications from earlier years are also available: 2013-2014, 2010-2011, 2004-2005, 2001-2002, 1998-1999, 1995-1996, 1992-1993.

## Advancing in Higher Education: <br> A Portrait of Latina/o College Freshmen at Four-Year Institutions, 1975-2006

October, 2008/90 pages
The purpose of this report is to provide a portrait of Latina/o students entering four-year colleges and universities from 1975-2006. It is intended as a data resource for higher education in understanding the unique characteristics of the increasing numbers of Latina/o first-time, full-time freshmen. The national data come from the Cooperative Institutional Research Program (CIRP) Freshman Survey. For the first time, CIRP trends are disaggregated by specific Latina/o ethnic origin group and by gender, to highlight the heterogeneity in the population unavailable in other national reports on Hispanic college students.

## Beyond Myths: The Growth and Diversity of Asian American College Freshmen: 1971-2005

 September, 2007/63 pagesThe first-year student trends examined in this report help to address some common characterizations of Asian American students, particularly with respect to their educational success, that are often overstated and taken out of context. The findings suggest that Asian Americans still have to overcome a number of obstacles, such as levels of family income and financial aid, to earn a coveted spot in higher education. This report features data collected from Cooperative Institutional Research Program (CIRP) Freshman Survey. It is based on the 361,271 Asian/Asian American first-time full-time college students from 1971-2005, representing the largest compilation and analysis of data on Asian American college students ever undertaken.

## First in My Family:

A Profile of First-Generation College Students at Four-Year Institutions Since 1971

## February, 2007/62 pages

First-generation college students are receiving increasing attention from researchers, practitioners, and policymakers with the aim of better understanding their college decisionmaking process and supporting their progress in higher education. This report explores the changing dynamic between first-generation college students and their non firstgeneration peers by utilizing longitudinal trends data collected through the CIRP Freshman Survey (1971-2005).

[^5]:    *denotes institution in national norms

[^6]:    Black Undergraduates from Bakke to Grutter: Freshman Status, Trends, and Prospects, 1971-2004 November, 2005/41 pages
    Summarizes the status, trends and prospects of Black college freshmen using data collected from 1971 to 2004 through the Cooperative Institutional Research Program (CIRP). Based on more than half a million Black freshman students, the report examines gender differences; socioeconomic status; academic preparation and aspirations; and civic engagement.
