41	private universities			2 Priv Univ	2 Priv Univ	1 Pub-Priv Univ/Pub 4yr

-The broad categories of Institution Control (i.e., public, private, and religious affiliation) are defined by data submitted to Integrated Postsecondary Educational Data System (IPEDS).

-Universities are those institutions defined by 2010 Basic Carnegie Classification as "Research Universities" or "Doctoral/Research Universities."

-Selectivity is based on median SAT Verbal + Math scores and/or ACT composite scores of the entering class as reported to IPEDS. Institutions with unknown selectivity are grouped with the low-selectivity institutions when computing National Norms.

-The stratification design presented here is used to group schools to develop population weights and should not be used as a measure of institutional or program quality.
